## INLEIDING.

Dit tweede deel der volkstelling, in twee gedeelten gesplitst, geeft in het eerste gedeelte de indeeling der feitelijke of getelde en der werkelijke bevolking naar den ouderdom of het geboortejaar en den burgerlijken staat, in het tweede gedeelte van beide soorten van bevolking naar de beroepen of middelen van bestaan. Achter dit deel zijn als bijlage gevoegd de uitkomsten der volkstelling op 1 Januarij 1850 in het Nederlandsche gedeelte der toenmalige provincie Limburg en de indeeling der bevolking naar den ouderdom en den burgerlijken staat volgens de uitkomsten dier telling, vroeger niet uitgegeven. Voorts is tevens van die gelegenheid gebruik gemaakt om de in de staten naar den ouderdom en burgerlijken staat voor de tweede tienjarige volkstelling bestaande leemten aan te vullen, zoodat hierdoor thans de indeeling naar den ouderdom en den burgerlijken staat voor de vier volkstellingen door den druk is bekend gemaakt.

### EERSTE GEDEELTE.

Even als bij de vorige werd op nieuw bij deze telling, niet van den ouderdom maar van den dag, de maand en het jaar der geboorte opgave verlangd. Daar deze telling heeft plaats gehad op den laatsten dag van het jaar, zoo volgt hieruit dat alle personen geboren in 1859 zich in het eerste, die in 1858 in het tweede levensjaar enz., bevinden. Bij deze telling werden de staten naar het geboortejaar en naar den ouderdom niet slechts opgemaakt voor de getelde of feitelijke bevolking, maar tevens voor de werkelijke; terwijl voor de voornaamste gemeenten en voor elke provincie de indeeling naar den ouderdom afzonderlijk werd opgemaakt voor de tijdelijk aanwezigen, wonende binnen het Rijk, in eene der Nederlandsche kolonien en in den vreemde en voor de afwezigen binnen het Rijk, in eene der Nederlandsche kolonien, in den vreemde en op zee, als ook voor hen wier verblijf onbekend is gebleven en die later gebleken zijn niet als aanwezig in de telling te zijn opgenomen. Vooral het onderzoek naar het geboortejaar der afwezigen ging met veel moeilijkheden gepaard, daar die opgave ontbrak op de biljetten en derhalve voor al de afwezigen, niet als aanwezig binnen het Rijk teruggevonden, het geboortejaar moest worden opgevraagd.

#### § 1. Onderzoek naar den graad van volledigheid der telling.

De juistheid der uitkomsten van eene volkstelling kan voor de eerste levensjaren, gedurende welke jaren verhuizingen zeldzaam zijn, eenigzins worden nagegaan door van de in elk jaar geboren en de tot aan den dag der volkstelling overledenen af te trekken. Die aftrekking geeft echter slechts eene berekening bij benadering, daar men hierbij van de vooronderstelling uitgaat dat b.v. alle overledenen binnen het jaar betrekking hebben tot de in dat jaar geboren, terwijl vooral in de eerste maanden van het jaar een groot getal dier overledenen geboren was in het voorafgaande jaar; hetzelfde geldt voor de overledenen van één tot twee, van twee tot drie en van meer jaren. Het verschil tusschen de berekende en de getelde (feitelijke en werkelijke) bevolking meet bij eene nauwkeurige telling het grootst zijn voor het eerste levensjaar, of voor het

jaar der telling (1859), dewijl voor dat jaar een groot deel der in den ouderdom van minder dan twaalf maanden overledenen behoort tot de geboren in het vorige jaar (1858). Zoo zijn b.v. geboren in 1858, alle overledenen in Januarij 1859, met gedeeltelijke uitzondering van hen die binnen de maand na de geboorte zijn overleden, alle overledenen in Februarij 1859, met uitzondering van de overledenen binnen de maand en gedeeltelijke uitzondering van hen, die binnen de tweede maand na de geboorte zijn overleden, alle overledenen in Maart 1859, met uitzondering van de overledenen binnen de twee maanden na de geboorte en gedeeltelijke uitzondering van hen, die in den ouderdom van twee tot drie maanden zijn overleden. Diezelfde uitzonderingen gelden voor de overige maanden, telkens met opklimming van ééne maand, zoodat van de overledenen binnen het jaar na de geboorte in de maand December, allen behooren tot de geboren in het jaar van hun overlijden, met gedeeltelijke uitzondering van hen, die in den ouderdom van elf tot twaalf maanden zijn overleden. Wij laten thans eenen staat volgen, waarin de geboren in de tien jaren, welke de telling voorafgaan, na aftrek der sterfte in de tien eerste levensjaren voor 1850, de negen eerste voor 1851 enz., en het eerste levensjaar voor 1859 voor elk geslacht, vergeleken worden met de uitkomsten der telling:

Geboortejaar. (Année de naissance.)	MANNELIJKE BEVOLKING. (Population masculine.)							VROUWELIJKE BEVOLKING. (Population féminine.)							Ouderdomsjaar Op 31 Dec. 1859. (Age au 31 Dec. 1859.)
	Geborenen de levensloos aan-gegevenen niet mede-gerekend. (Nés sans compter les précedés sans vie.)	Sterfte tot 1 Jan. 1859. (Morts jusqu'au 1 Jan. 1859.)	BEVOLKING. (Population.)					Geborenen de levensloos aan-gegevenen niet mede-gerekend. (Nés sans compter les précedés sans vie.)	Sterfte tot 1 Jan. 1859. (Morts jusqu'au 1 Jan. 1859.)	BEVOLKING. (Population.)					
			Be-rekende. (Calculés.)	Facto-rijke. (Réels.)	Verschl in meer der getalde bevolking. (Différence en plus pour la pop. totale.)	Werk-lijke. (Réels.)	Verschl in meer der werke-lijke bevolking. (Différence en plus pour la pop. réelle.)			Be-rekende. (Calculés.)	Facto-rijke. (Réels.)	Verschl in meer der getalde bevolking. (Différence en plus pour la pop. totale.)	Werk-lijke. (Réels.)	Verschl in meer der werke-lijke bevolking. (Différence en plus pour la pop. réelle.)

Totaal	562216	174050	378166	382846	4180	382555	4889	528768	151991	371772	376856	488	376856	5084	

Op dezen staat is van de geboren in 1850/59 het geheele getal overledenen in de tien eerste levensjaren, en dus een te groot getal afgetrokken. Van de overledenen in 1859, op den ouderdom van 9 tot 10 jaren is een gedeelte of nagenoeg de helft geboren in 1849; terwijl van de overledenen binnen het jaar na de geboorte in 1859 een gedeelte behoort tot de geboren in 1858, en van de geboren in 1859 een gedeelte eerst in den loop van 1860 sterft binnen het jaar na de geboorte. Dit betoog wordt verduidelijkt door de volgende voorstelling:

$\frac{1}{2}$  (geboren in 1849 en 1850) = gemiddeld getal geboren gedurende één jaar, waarvan de gemiddelde dagteekening . . . . . 1 Januarij 1850.  
aftrekking der overledenen beneden het jaar na de geboorte in 1850.  
blijft gemiddeld getal levenden volle één jaar oud op . . . . . 1 Januarij 1851.

$\frac{1}{2}$  (geboren in 1850 en 1851) = gemiddeld getal geboren gedurende één jaar, waarvan de gemiddelde dagteekening . . . . . 1 Januarij 1851.  
aftrekking der overledenen beneden het jaar na de geboorte in 1851.  
blijft gemiddeld getal levenden volle één jaar oud op . . . . . 1 Januarij 1852.

Waaruit volgt:  
geboren in 1850 = gemiddeld getal geboren gedurende één jaar, waarvan de gemiddelde dagteekening . . . . . 1 Julij 1850.  
aftrekking  $\frac{1}{2}$  (overledenen beneden het jaar na de geboorte in 1850 en 1851).  
blijft van de geboren in 1850 gemiddeld getal levenden volle één jaar oud op 1 Julij 1851.

Dezelfde berekening geldt voor de volgende jaren.

$\frac{1}{2}$  (geboren in 1858 en 1859) = gemiddeld getal geboren gedurende één jaar, waarvan de gemiddelde dagteekening . . . . . 1 Januarij 1859.  
aftrekking der overledenen beneden het jaar na de geboorte in 1859.  
blijft gemiddeld getal levenden volle één jaar oud op . . . . . 1 Januarij 1860.

$\frac{1}{2}$  (geboren in 1859 en 1860) = gemiddeld getal geboren gedurende één jaar, waarvan de gemiddelde dagteekening . . . . . 1 Januarij 1860.  
aftrekking der overledenen beneden het jaar na de geboorte in 1860.  
blijft gemiddeld getal levenden volle één jaar oud op . . . . . 1 Januarij 1861.

Waaruit volgt:  
geboren in 1859 = gemiddeld getal geboren gedurende één jaar, waarvan de gemiddelde dagteekening . . . . . 1 Julij 1859.  
aftrekking  $\frac{1}{2}$  (overledenen beneden het jaar na de geboorte in 1859 en 1860).  
blijft van de geboren in 1859 gemiddeld getal levenden volle één jaar oud op 1 Julij 1860.

Hieruit blijkt dat de geboren in 1849, hun aandeel hebben in de sterfte gedurende de tien eerste levensjaren in 1850/59 en dat van de geboren in 1859, overleden beneden het jaar, een gedeelte sterft in 1859, een ander gedeelte in 1860.

Werd in elk der eerste levensjaren een nagenoeg gelijk getal kinderen door den dood weggerukt, zou men zich kunnen behelpen met de aftrekking der sterfte in de  $\frac{9}{10}$  eerste levensjaren. De jaarlijksche sterfstaten leeren echter dat de sterfte verreweg het grootst is in het eerste levensjaar na de geboorte en tot op zekeren leeftijd aanhoudend daalt, naarmate men hoogere levensjaren bereikt. Ten einde de overledenen in de tien eerste levensjaren of van 1850 tot en met 1859 terug te brengen tot het geboortejaar, waartoe zij behooren, hebben wij gebruik gemaakt van den tienjarigen sterftetaal, voorkomende in het eerste gedeelte van de tiende en elfde jaargangen van het statistisch jaarboek blad. 82 volgende. Uit dien staat blijkt dat, op de honderd overledenen beneden het jaar, zijn overleden van elk geslacht in den ouderdom van:

Op honderd overledenen van elk geslacht beneden het jaar. (Sur cent décès de chaque sexe au dessous d'un an.)	0 tot 1 maand. (mois.)	1 tot 2 maanden.	2 tot 3 maanden.	3 tot 4 maanden.	4 tot 5 maanden.	5 tot 6 maanden.	6 tot 8 maanden.	8 tot 10 maanden.	10 tot 12 maanden.
Jongens . . . . . (Garçons.)	25.84	12.97	11.70	10.54	8.26	6.52	9.74	7.59	6.84
Meisjes . . . . . (Filles.)	28.82	12.31	11.78	10.56	8.32	6.68	10.20	8.49	7.89

De sterfte in de eerste maand na de geboorte staat dus nagenoeg gelijk met tweemaal de sterfte in de tweede maand. Wanneer men in die reden de sterfte van de eerste maand in vier deelen splitst, dan verkrijgt men voor de eerste halve maand twee derde, voor de laatste één derde der sterfte en voor de eerste kwart maand of de eerste zeven of acht dagen na de geboorte twee derde van het twee derde gedeelte of vier negende der sterfte binnen de maand na de geboorte.

Van de overledenen binnen de kwart maand na de geboorte is slechts één achtste, van die binnen de halve maand één derde geboren in de vorige maand. Men verkrijgt naar die berekening voor de overledenen binnen de maand na de geboorte nagenoeg twee negende geboren in de vorige maand, zeven negende geboren in de maand van hun overlijden. Van de overledenen in de tweede maand behoort nagenoeg één derde, van die in de overige maanden nagenoeg twee vijfde tot de geboren eene maand vroeger dan die welke het getal levensmaanden op den dag van hun overlijden aanwijst.

Van de overledenen in den leeftijd van één tot drie jaren en in dien van twee tot vier jaren sterven nagenoeg twee derde één tot twee jaren en twee tot drie jaren oud. Uit dien hoofde is van de overledenen in de tweede en derde levensjaren of van één tot twee en twee tot drie jaren oud, slechts één derde beschouwd als de sterfte van kinderen geboren een jaartal vroeger dan het jaartal, hetwelk het getal levensjaren op den dag van hun overlijden aanwijst. Voor de verdere levensjaren, van het vierde tot het tiende, zijn twee vijfde

der overledenen beschouwd als behorende tot de één jaat vroeger geboren. Die berekening geeft de volgende uitkomsten:

STERFTE-JAREN. <small>(Années des décès.)</small>	Geboorte-jaar der overledenen. <small>(Année de naissance des décédés.)</small>	Levensjaren tijdens het overlijden. <small>(Âge à l'époque du décès.)</small>	OVERLEDENEN. <small>(Décédés.)</small>		Geboorte-jaar der overledenen. 1853	53563	17840	35723	35662	- 61	35690	- 33	50734	15686	35048	35168	+ 120	35181	+ 133	6-7
1852	56475	19273	37202	36774	- 428	36794	- 408	53592	17057	36535	36208	- 327	36238	- 297	7-8
1851	54994	18424	36570	36039	- 531	36068	- 502	52375	16810	36063	35452	- 611	35478	- 587	8-9
1850	54145	17635	36510	36120	- 390	36142	- 368	51193	15596	35598	35159	- 439	35190	- 408	9-10
Tienj. uitkomst	552216	168605	383611	382346	- 1265	382555	- 1056	523763	147012	376751	376656	- 95	376856	+ 105	

Ter beoordeeling dezer berekening bij benadering moet niet op de uitkomst voor de enkele jaren maar op de tienjarige einduitkomst gelet worden. Waar de volkstelling (feitelijk of werkelijk) een hooger cijfer aanwijst dan het cijfer door de berekening verkregen, was de sterfte der in dat jaar geboren tot aan den dag

der telling *beneden*, waar het berekende cijfer de uitkomst der telling verre overtreft, was die sterfte *boven* de gemiddelde tienjarige sterfte.

Meer waarde heeft de vergelijking van het getal ingeschrevenen ter loting voor de nationale militia, op een tijdstip het naast komende bij dat der telling, met het cijfer der mannelijke bevolking voor het ouderdomsjaar der inschrijving bij de telling verkregen. In Januarij 1860 werden ter loting ingeschreven de geboren in 1841, tijdens de telling of op 31 December 1859 18 tot 19 jaren oud. De volgende staat geeft die vergelijking voor elke provincie:

PROVINCIE. <small>(Provinces.)</small>	Ingeschrevenen in 1860. <small>(Miliciens inscrits en 1860.)</small>	MANNELIJKE BEVOLKING GEBOREN IN 1841, TIJDENS DE TELLING 18 TOT 19 JAREN OUD. <small>(Population masculine née en 1841, de 18 à 19 ans à l'époque du recensement.)</small>			
		Feitelijke. <small>(Recensée.)</small>	Verskil in minder voor de feitelijke. <small>(Différence en moins pour la population recensée.)</small>	Werkelijke. <small>(Réelle.)</small>	Verskil in minder voor de werkel. <small>(Différence en moins pour la population réelle.)</small>
Noordbrabant . . . . .	4173	4040	133	4060	113
Gelderland . . . . .	4146	3973	173	3998	148
Zuidholland . . . . .	5987	5569	418	5732	255
Noordholland . . . . .	5267	4994	273	5201	66
Zeeland . . . . .	1726	1735	- 9	1768	+ 42
Utrecht . . . . .	1573	1566	7	1581	+ 8
Friesland . . . . .	2765	2696	69	2756	9
Overijssel . . . . .	2339	2418	- 79	2449	+ 110
Groningen . . . . .	2093	2029	64	2115	+ 22
Drenthe . . . . .	950	979	- 29	999	+ 49
Limburg . . . . .	2158	1957	201	2016	142
HET RIJK . . . . .	33127	31956	1171	32678 (1)	449

Daar de telling een paar weken vroeger dan de inschrijving heeft plaats gehad, zou bij eene volledige telling de mannelijke bevolking, geboren in 1841, iets hooger moeten zijn dan het getal ingeschrevenen. De verkregen uitkomst is derhalve een gevolg van leemten in de telling. De leemten zijn het grootst voor Limburg, Noordbrabant, Gelderland, Zuid- en Noordholland. Hieruit kan echter niet de gevolgtrekking worden gemaakt dat juist in die provincien de telling met de minste naauwkeurigheid geschied is, daar bij deze telling aan het woord *woonplaats* eene beteekenis werd gegeven verschillend van die bij de inschrijving aangenomen. Zoo worden bijv. bij de telling leerlingen op kostscholen beschouwd als werkelijk wonende in de gemeente, waar die school zich bevindt, terwijl zij worden ingeschreven in de gemeente waar hunne ouders of voogden wonen. Op tien duizend ingeschrevenen geeft het cijfer der mannelijke bevolking van 18 tot 19 jaren, naar de feitelijke bevolking een te kort van 353, naar de werkelijke van 185, 3.53 en 1.35 op de honderd.

§ 2. Vergelijking der vier tienjarige volkstellingen.

Door de aanvulling der vroeger bestaande leemten in de staten naar den ouderdom en den burgerlijken staat voor de beide eerste volkstellingen, op 1 Januarij 1830 en 1 Januarij 1840, (zie bijlage bladz. 407 volg. van dit deel) is eene vergelijking van de uitkomsten der vier tienjarige volkstellingen naar den ouderdom en den burgerlijken staat doenlijk geworden. De staat A, achter deze inleiding gevoegd, geeft hiervan naar de volgende negen levensstijperken 0-5, 5-10, 10-12, 12-16, 16-20, 20-30, 30-50, 50-75 jaren en 75 jaren en daarboven een algemeen overzicht. Daar voor de eerste volkstelling de ouderdom van de militairen, met hunne gezinnen en van de gevangenen in Noordbrabant onbekend is gebleven, zijn die personen naar de verschillende levensstijperken op den staat ingedeeld naar den maatstaf van hunne indeeling volgens de uitkomsten der laatste of vierde tienjarige volkstelling. Bij de drie vorige volkstellingen werden de personen gescheiden van echt niet afzonderlijk opgegeven, doch gevoegd bij de ongehuwden, terwijl enkel bij de twee laatste tellingen melding wordt gemaakt van de personen wier burgerlijke staat onbekend is gebleven. Op den staat A zijn voor de beide laatste tellingen deze personen voor elk geslacht bij het totaal gevoegd. Deze staat leert den toestand en het betrekkelijk aandeel van elk bestanddeel der bevolking kennen gedurende het dertig-

(1) Waaronder 3 wier woonplaats onbekend is gebleven.

jarig tijdperk of van 1 Januarij 1830 tot en met 31 December 1859. Zoo is bijv. het getal personen op den leeftijd van 30 tot 50 jaren op 31 December 1859, het in leven gebleven overschot van het getal personen beneden de 20 jaren op 1 Januarij 1830. Wanneer vestiging uit en vertrek naar het buitenland, zoo als hier te lande, geenen grooten invloed op den loop der bevolking gedurende eene reeks van jaren uitoefenen, kan dus, door vergelijking der gegevens van vroegere met latere tellingen, de betrekkelijke mate van het overschot der bevolking op bepaalde leeftijden of van het getal overleden en, na verloop van 10, 20 en 30 jaren, van de personen op bepaalden leeftijd tijdens de vorige tellingen worden berekend, en kan men tevens door vergelijking van twee of drie opvolgende tellingen nagaan of de afsterfing van die personen betrekkelijk is af- of toegenomen.

Men ziet b.v. uit dit overzicht, dat voor beide geslachten de tienjarige afsterfing der bevolking van 0—10 jaren het grootst is geweest van de tweede op de derde volkstelling of van 1840 tot 19 November 1849, tot welk tijdvak de jaren van schaarste van levensmiddelen 1846 en 1847 en van het heerschen van den asiatischen braakloop behooren, het kleinst van de derde op de vierde volkstelling of van 19 Nov. 1849 tot 31 Dec. 1859.

Wij gaven in de inleiding tot het eerste deel bladz. IV en V, een overzicht van de vermeerdering der bevolking naar de kunne; het is van meer belang te weten in welke mate de bevolking van elken leeftijd in de vermeerdering gedeeld heeft en tevens welken invloed zij op de indeeling der personen naar den burgerlijken staat heeft uitgeoefend. De volgende staat geeft de dertigjarige vermeerdering (van 1 Januarij 1830 tot 31 December 1859) der bevolking naar den burgerlijken en naar de negen op staat A voorkomende levens-tijdperken. De berekening is voor de laatste telling gemaakt op de werkelijke bevolking.

Uit dit overzicht volgt dat het getal mannen, volstrekt en betrekkelijk, gedurende de dertig jaren meer dan dat der vrouwen is toegenomen. De volstreekte vermeerdering was veel grooter voor de ongehuwde mannen dan voor de ongehuwde vrouwen. De weduwnaars zijn wel is waar in getal veel minder, in betrekkelijke reden echter veel meer dan de weduwen toegenomen. Naar de leeftijden was de betrekkelijke vermeerdering voor beide geslachten het kleinst voor den leeftijd van 5 tot 10 jaren, het grootst voor het mannelijke geslacht voor dien van 30 tot 50, met welke vermeerdering voor dat geslacht die van den leeftijd van 16 tot 20 jaren zeer weinig verschilt. Voor het vrouwelijke geslacht voor dien van 16 tot 20 jaren; aan welken leeftijd die van 30 tot 50 voor dat geslacht het meest nabij komt. De leeftijd van 75 en meer jaren geeft vermindering voor het mannelijke en slechts eene zeer onbeduidende vermeerdering voor het vrouwelijke geslacht. Het geringer getal mannen boven de 75 jaren op 31 December 1859 dan op 1 Januarij 1830, niettegenstaande de mannelijke bevolking in dat tijdsverloop met meer dan één vierde of 27.47 ten honderd is toegenomen, kan geenszins bevreemden, wanneer men overweegt, dat de personen geboren in 1784 en vroegere jaren zich gedurende de voor ons vaderland zoo noodlottige laatste jaren der vorige en eerste van deze eeuw in den mannelijken leeftijd van 20 tot 40 jaren bevonden, en dat hunne gelederen vooral door de bloedige oorlogen van den toenmaligen tijd zijn getroffen. Wanneer men de vermeerdering voor elken burgerlijken staat afzonderlijk nagaat, dan vindt men de grootste vermeerdering voor de ongehuwden van het mannelijke geslacht op den leeftijd van 30 tot 50, voor die van het vrouwelijke op dien van 16 tot 20 jaren. Groot was vooral de vermindering der ongehuwde mannen boven de 75 jaren. Opmerkelijk is de aard der vermeerdering voor de gehuwden. Volstrekt en betrekkelijk is voor beide geslachten het getal gehuwden beneden de 20 jaren aanmerkelijk afgenomen, waaruit volgt dat thans de huwelijken op lateren leeftijd dan vóór 30 jaren worden voltrokken. Die invloed doet zich bij het mannelijke geslacht nog op den leeftijd van 20 tot 30 jaren gevoelen, op welken het getal gehuwden op beide tijdstippen nagenoeg gelijk staat. Voor de gehuwde mannen was de vermeerdering betrekkelijk het grootst op den leeftijd van 30 tot 50, voor de gehuwde vrouwen iets grooter dan op dezen leeftijd op dien van 50 tot 75 jaren. De vermindering van het getal weduwnaars beneden den leeftijd van 30 en van dat der weduwen beneden dien van 20 jaren is hiervan het onvermijdelijk gevolg. De eersten zijn het meest toegenomen voor den leeftijd van 30 tot 50, de laatste voor dien van 50 tot 75 jaren. De vermeerdering voor den leeftijd van 75 jaren en meer is voor beide geslachten van weinig belang.

De staat A geeft voor de daarop voorkomende leeftijden niet slechts het getal personen bij elke telling aanwezig maar tevens de reden op honderd voor elken leeftijd, met onderscheiding zoowel van het geslacht als van den burgerlijken staat. Het is van belang naar die reden de uitkomsten der vier tellingen te vergelijken. Wij voegen hierbij de opmerking dat voor elk levenstijdperk het teeken +, vóór de betrekkelijke reden geplaatst, te kennen geeft dat voor die telling vergeleken met de drie overige, het grootste, het teeken — dat het kleinste betrekkelijk aandeel wordt verkregen. De volgende staat geeft, met vermelding

van de geboortejaren onder de reden, van dit tweede gedeelte van staat A voor elk van beide geslachten, zonder onderscheid van burgerlijken staat, een beknopt overzicht.

	1850/59		1840/49		1830/39		1800/30		1785/1810			1785 enz.

Uit dit overzicht volgt dat het betrekkelijk aandeel betrekkelijk het grootst was bij beide geslachten voor de bevolking beneden de 10 en boven de 75 jaren op 1 Januarij 1830, voor die van 10 tot 20 jaren op 1 Januarij 1840, van 20 tot 30 jaren op 19 November 1849, van 30 tot 50 en 50 tot 75 jaren op 31 December 1859; betrekkelijk het kleinst voor beide geslachten, voor de bevolking van 0 tot 10 jaren op 19 November 1849, voor die van 10 tot 20 op 31 December 1859, van 20 tot 30 voor het mannelijke geslacht op 1 Januarij 1840, voor het vrouwelijke op 1 Januarij 1830, voor beide geslachten van 30 tot 50 op 1 Januarij 1830, van 50 tot 75 op 1 Januarij 1840, van 75 en daarboven op 31 December 1859. Dit verschil in aandeel van de tot elk levenstijdperk behorende gedeelten der bevolking, op het tijdstip van elke telling, moet geenszins aan toevallige omstandigheden of aan meerdere of mindere naauwkeurigheid der telling worden toegeschreven. Het kleinste aandeel is meestal in overeenstemming met geboortejaren of onderhevig geweest aan toestanden, welke op het tijdens de telling overgebleven cijfer nadeelig hebben gewerkt. De geboren in 1785 en vorige jaren en ook een gedeelte der geboren van 1780 tot 1800 bevonden zich in den leeftijd van 20 tot 40 jaren gedurende het voor ons vaderland zoo noodlottig tijdperk 1795 tot 1815. Van dit gedeelte der bevolking, vooral van het mannelijke gedeelte, werd toen een groot deel het slagtoffer der bloedige oorlogen. De gevolgen hiervan hebben nadeelig gewerkt zoowel op het betrekkelijk aandeel der bevolking van 30 tot 50 jaren op 1 Januarij 1830, als op dat van de bevolking van 75 en meer jaren op 31 December 1859. Het te kort was dan ook op beide tijdstippen voor die levenstijdperken grooter voor het mannelijke dan voor het vrouwelijke geslacht, dewijl het te kort voor het laatste enkel het gevolg was van een kleiner getal geboorten in het laatst der vorige eeuw, zoowel door de afwezigheid der mannelijke bevolking in den bloei des levens als door de mindere welvaart. Het te kort voor de bevolking van 50 tot 75 jaren, geboren in 1765 tot 1790 en tusschen 1785 en 1810 20 tot 40 jaren oud, is een gevolg van de tijdsomstandigheden gedurende dit laatste tijdperk. Dit te kort was dan ook veel grooter voor het mannelijke dan voor het vrouwelijke geslacht. Het te kort op 19 November 1849 voor de bevolking van 0 tot 10 jaren, geboren in 1840/49, waarmede in overeenstemming dat voor de bevolking van 10 tot 20 jaren op 31 December 1859, is een gevolg van de schaarschte der levensmiddelen in 1846 en 1847 en van den Aziatischen braakloop in 1848 en 1849, welke zoowel op het geboorte- als op het sterftecijfer der kinderen een nadeeligen invloed hebben uitgeoefend.

Het getal personen van hoogen leeftijd is in ons vaderland betrekkelijk gering. Naar de laatste volkstelling op 31 December 1859 telde men voor de werkelijke bevolking op honderd duizend mannen slechts 388, op een gelijk getal vrouwen 510, die den tachtigjarigen leeftijd bereikt hebben; de provincien, te beginnen met die waar het getal personen van tachtig en meer jaren het grootst is, laten zich rangschikken in de volgende orde:

MANNEN.				VROUWEN.			
Limburg.	Geiderland.	Zuidholland.	Friesland.	Utrecht.	Zuidholland.	Het Rijk.	Zeeland.
Noordbrabant.	Overijssel.	Groningen.	Zeeland.	Limburg.	Gelderland.	Groningen.	Drenthe.
Utrecht.	Het Rijk.	Drenthe.	Noordholland.	Noordbrabant.	Overijssel.	Friesland.	Noordholland.

§ 4. Bevolkingstafelen.

Op de bevolkingstafelen (staat B achter deze inleiding), voor elke provincie en voor elk geslacht opgemaakt uit de ouderdomstafelen naar de werkelijke bevolking, is de bevolking van elke kunne zoowel voor de provincien als voor het Rijk tot *honderd duizend* teruggebracht. Op deze tafelen geeft elk jaar te kennen het getal personen, hetwelk op *honderd duizend* zielen, tijdens de volkstelling, dat jaar en een hooger leeftijds bereikt heeft. Uit die staten kan door aftrekking dadelijk worden opgemaakt het getal personen op *honderd duizend* op een bepaald levensstijdsperk aanwezig. Aan den voet van den staat is die aftrekking gemaakt in vijfjarige levensstijdsperken tot aan den ouderdom van tachtig jaren.

Uit die tafelen blijkt, dat van de elf provincien het grootste betrekkelijk aandeel op 100,000 zielen geven: bij het mannelijk geslacht voor den leeftijd van 1 tot en met 30 en meer jaren Noordbrabant, voor dien van 35 en meer jaren Noordbrabant en Limburg, van 40 tot en met 85 en meer jaren Noordbrabant, voor dien van 90 en meer jaren Noordbrabant en Gelderland; bij het vrouwelijke voor dien van 1 tot en met 45 en meer jaren Noordbrabant; van 50 tot en met 75 en meer jaren Limburg, van 80 en 85 en meer Utrecht, van 90 en meer Zuidholland, van 95 en meer Gelderland. Het betrekkelijk aandeel is daarentegen het kleinst in de volgende provincien: voor het mannelijk geslacht in Zuidholland op den leeftijd van 1 tot en met 8 en meer jaren, Noordholland op de leeftijden van 9 en meer, 40 tot en met 70 en 80 en meer jaren, Groningen op die van 10 tot en met 25 en meer, Friesland op die van 30 en 35 en meer, Zeeland op die van 75, 85 en 90 en meer jaren, Zeeland en Drenthe op dien van 95 en meer jaren; voor het vrouwelijke geslacht in Drenthe van 1 tot en met 70 en meer jaren, in Noordholland op de leeftijden van 75, 80 en 85 en meer en in Zeeland op die van 90 en 95 en meer.

De volgende staat, getrokken uit de reden afgeleid uit de bevolkingstafelen, geeft in vijfjarige levensstijdsperken voor elk geslacht de provincie, waar het betrekkelijk aandeel voor elk levensstijdsperk het grootst en het kleinst is.

LEVENSTIJDPERKEN.	MANNEN.		VROUWEN.

Op bladz. XII der inleiding tot het eerste deel gaven wij voor elke provincie zonder onderscheid van ouderdom de reden tusschen beide kunne. Wij laten thans in den volgenden staat die rede volgen bij vijfjarige levensstijdsperken tot aan den ouderdom van tachtig jaar en voor den leeftijd van tachtig en meer jaren. De staat geeft voor elke provincie het getal vrouwen op honderd mannen, het teeken —, op dezen en de overige staten voor het cijfer geplaatst, geeft te kennen dat de reden beneden de gemiddelde voor het Rijk is gebleven, terwijl voor het cijfer der provincie welke de hoogste reden geeft het teeken + geplaatst is.

Uit dezen staat blijkt dat slechts in de provincie Drenthe het getal mannen op elken leeftijd dat der vrouwen overtreft, hetgeen hoofdzakelijk aan de bevolking der bedelaarsgestichten moet worden toegeschreven. Het getal vrouwen overtreft dat der mannen op elken leeftijd in Zuid- en Noordholland, in de laatste provincie met eene niet belangrijke uitzondering voor den leeftijd van 5 tot 10 jaren. Voor Noordbrabant en Limburg geven de 25, voor Gelderland de 40, voor Zeeland en Groningen de 15, Utrecht, Friesland, Overijssel en het Rijk de 20 eerste levensjaren eene overmaat voor de mannen. Van af voornoemde levensjaren behouden de vrouwen steeds de overmaat in Noordbrabant, Utrecht en het Rijk. In Gelderland geven de mannen op nieuw eene overmaat op den leeftijd van 45 tot 50, in Zeeland op die van 20 tot 25 en van 40 tot 45, in Friesland op die van 25 tot 30 en van 35 tot 45, in Overijssel op die van 25 tot 30 en van 35 tot 65, in Groningen op dien van 35 tot 40 en in Limburg op dien van 30 tot 55. Bij klimmenden leeftijd neemt in de meeste provincien de overmaat toe voor het vrouwelijk geslacht; het meest in Zuid- en Noordholland, Zeeland, Utrecht, Friesland en Groningen. De volgende staat, naar leeftijden telkens klimmende met tien jaren ingedeeld, geeft hiervan een duidelijk overzicht:

LEEFTIJDEN. (Age de service.)	Noordbrabant.	Gelderland.	Zuidholland.	Noordholland.	Zeeland.	Utrecht.	Friesland.	Overijssel.	Groningen.	Drenthe.	Limburg.	Het Rijk.

Uit dezen staat blijkt dat in alle provincien, met uitzondering van Drenthe, voor den leeftijd van 50 en meer jaren het getal vrouwen dat der mannen overtroef en wel in die mate dat gemiddeld in het Rijk op 100 mannen 115 à 116 vrouwen van dien leeftijd worden aangetroffen. De provincie Noordholland geeft op elken leeftijd de grootste overmaat voor het vrouwelijke geslacht. Eene zeer onbeduidende uitzondering maakt die van 80 en meer jaren, op welken leeftijd de overmaat het grootst is voor de provincie Zeeland. In Drenthe daarentegen blijft op elken leeftijd de reden het minst gunstig voor het vrouwelijke geslacht en worden de vrouwen steeds in getal door de mannen overtroffen. De overmaat voor het mannelijk geslacht is voor die provincie het grootst op den leeftijd van 50 en meer jaren. In Overijssel begint de overmaat voor het vrouwelijke geslacht eerst met het 50ste jaar, in Limburg met het 30ste en in Gelderland met het 20ste, terwijl in de zeven overige provincien reeds met 0 en meer jaren het getal vrouwen grooter is dan dat der mannen.

Wij gaven in de inleiding tot het eerste deel, bladz. XVIII, voor elk geslacht en voor elke provincie de reden naar den burgerlijken staat zonder onderscheid van ouderdom. Men vindt thans op staat C achter deze inleiding die reden voor elk geslacht naar vijfjarige levensstijperken van den leeftijd van 15, beneden welken leeftijd allen ongehuwd zijn, tot aan dien van 80 jaren; terwijl daarenboven de reden is opgemaakt voor de personen van 15, 20, 80 en meer jaren. Uit dien staat is getrokken het volgende overzicht, hetwelk voor elk levensstijperk te kennen geeft in welke provincie voor elk geslacht het grootste en kleinste evenredig aandeel voor elken burgerlijken staat wordt verkregen:

LEVENSTIJDPERKEN.	ONGENUWD.		GEHUWD.		PERSONEN IN WEDUWENSTAAT.

Uit dien staat blijkt dat voor beide geslachten, met uitzondering van den leeftijd van 60 tot 65 voor het mannelijke en van 70 en meer jaren voor het vrouwelijke geslacht, het evenredig aandeel het grootst is voor de ongehuwden in Noordbrabant, terwijl in die provincie dit aandeel over het algemeen voor beide geslachten het kleinste is voor de gehuwden; voor de mannen maakt hierop uitzondering de leeftijd van 50 tot 60, voor de vrouwen die van 50 jaren en daarboven. Het getal ongehuwden is betrekkelijk het kleinste: voor de mannen over het algemeen en op de leeftijden van 15 tot 30 jaren en van 80 en meer in Zuidholland, op die van 35 tot 55 en van 70 tot 75 in Noordholland, van 80 tot 85 in Friesland, van 55 tot 60, 65 tot 70 en 75 tot 80 in Zeeland en van 60 tot 65 in Groningen; voor de vrouwen over het algemeen en op den leeftijd van 25 tot 45, 50 tot 60, 80 en daarboven in Friesland, op dien van 15 tot 25 in Zeeland, van 45 tot 50, 65 tot 80 in Drenthe en van 60 tot 65 in Groningen. Dat der gehuwden is betrekkelijk het grootst voor de mannen over het algemeen en op de leeftijden van 15 tot 35 en 60 en daarboven in Zuidholland, op die van 35 tot 45 en 50 tot 55 in Noordholland, van 45 tot 50 en van 55 tot 60 in Zeeland. Voor de weduwnaars is het betrekkelijk aandeel over het algemeen het grootst van 20 jaren af in Overijssel; naar de verschillende levensstijperken van 20 tot 25 jaren in Zuid- en Noordholland, van 25 tot 50 in Friesland, van 50 tot 60 in Drenthe, van 60 tot 65 in Overijssel, van 65 tot 75 en van 80 en daarboven in Zeeland, van 75 tot 80 in Noordholland. Slechts in Zuidholland trof men weduwnaars op den leeftijd van 15 tot 20 jaren; hun aandeel was betrekkelijk het kleinste over het algemeen in Zeeland, voor den leeftijd van 20 tot 25 jaren in Limburg, voor dien van 25 tot 30 in de laatste provincie en in Noordbrabant, van 30 tot 35 in Noordbrabant, van 35 tot 65, 70 tot 75, 80 en daarboven in Gelderland, van 65 tot 70 en van 75 tot 80 in Zuidholland. Voor de weduwen was betrekkelijk het aandeel het grootst over het algemeen in Zuidholland, van 20 jaren af in Friesland; naar de verschillende leeftijden van 15 tot 20 jaren in Zuidholland en Friesland, van 20 tot 25 in Zuidholland, van 25 tot 40 in Groningen, van 40 tot 60 in Noordholland, van 60 tot 65 in Noordholland en Zeeland, van 65 tot 75 in Zeeland, van 75 en meer in Friesland. In vier provincien Noordbrabant, Overijssel, Groningen en Drenthe waren geene weduwen beneden de 20 jaren. Haar getal was over het algemeen betrekkelijk het kleinste in Drenthe; voor den leeftijd van 20 tot 25 jaren in Gelderland, van 25 tot 40, 45 en daarboven in Limburg en van 40 tot 45 in Drenthe.

De uitkomst, welke Limburg opgeeft als de provincie waarin het betrekkelijk aandeel voor de weduwnaars over het algemeen het grootst is, Zeeland als die waar dit aandeel het kleinste is, zal wellicht bevreemden, daar voor de enkele levensstijperken noch de eerste provincie met het grootste, noch de laatste met het kleinste aandeel een enkel maal voorkomt. Van die schijnbare tegenstrijdigheid moet de oplossing hierin gezocht worden, dat in Limburg betrekkelijk veel meer, in Zeeland daarentegen veel minder personen van hoogen leeftijd worden aangetroffen en dat juist op de hoogere leeftijden het betrekkelijk aandeel der weduwnaars het grootst is. Men telde op honderd duizend mannen in Limburg 2986, in Zeeland slechts 1711 van 70 en meer jaren.

Sedert 1850 worden jaarlijks staten opgemaakt der huwelijken naar den ouderdom van elk der beide echtgenooten tijdens het voltrekken van het huwelijk. Uit de opgaven der volkstelling kan enkel worden nagegaan hoeveel gehuwde mannen en gehuwde vrouwen op elken leeftijd aanwezig zijn en in welke provincie het aandeel der gehuwde personen op jeugdigen en meer gevorderden leeftijd het grootst is, geenszins hoeveel mannen van bepaalde leeftijd met vrouwen van bepaalde leeftijden en omgekeerd op den dag der telling te zamen door den echt waren verbonden. Het is niettemin van belang na te gaan het getal gehuwde mannen en vrouwen in elke provincie naar bepaalde levensstijperken. De volgende staat geeft dit overzicht in vijfjarige levensstijperken van 15 tot 80 jaren en voorts voor de gehuwde personen van 80 en meer jaren. De berekening is gemaakt voor elke provincie en van het Rijk op 10,000 gehuwden van elk geslacht.

Uit dit overzicht volgt dat van de elf provincien: voor de gehuwde mannen het aandeel het kleinste is voor de leeftijden van 15 tot 30 en 35 tot 40 in Noordbrabant, van 30 tot 35 in Limburg, van 40 tot 45 in Utrecht, van 45 tot 50 in Zuidholland, van 50 tot 55 in Friesland, van 55 tot 80 in Noordholland en voor 80 en meer jaren in Zeeland; het grootst voor de leeftijden van 15 tot 20 en 30 tot 35 in Zuidholland, van 20 tot 25 en 40 tot 45 in Zeeland, van 25 tot 30 in Friesland, van 35 tot 40 in Noordholland, van 45 tot 50 en 55 tot 60 in Noordbrabant, van 50 tot 55, 60 tot 65 en voor 75 en meer jaren in Limburg, van 65 tot 75 in Gelderland; voor de gehuwde vrouwen het kleinste voor de leeftijden van 15 tot 30 jaren in Noordbrabant, van 30 tot 40 in Limburg, van 40 tot 45 in Utrecht, van 45 tot 50 in Zuidholland, van 50 tot 55 en van 70 tot 75 in Zeeland, van 55 tot 70 en van 75 tot 80 in Noordholland, voor de jaren 80 en meer in Noordholland en Zeeland; het grootst voor de leeftijden van 15 tot 25 in Zeeland, 25 tot 30 in Friesland, 30 tot 40 in Noordholland, 40 tot 55 in Noordbrabant, 55 en meer in Limburg.

Uit den voorgaanden staat volgt dat men voor elke provincie de helft der gehuwde personen of op 10,000 van elk geslacht 5000 verkrijgt beneden en boven het volgende levensjaar. Op den volgenden staat is die provincie het eerst geplaatst waar het getal gehuwde personen op jeugdigen leeftijd het grootst, terwijl de provincie waar dit getal het kleinste is den laatsten rang bekleedt. Uit den staat volgt dus dat bij beide geslachten in Noordholland op den *minst*, bij het mannelijke geslacht in Limburg, bij het vrouwelijke in Noordbrabant op den *meest* gevorderden leeftijd de huwelijken werden voltrokken.

GEHUWDE MANNEN.				GEHUWDE VROUWEN.			
(Age moyen des hommes mariés.)				(Age moyen des femmes mariées.)			
Noordholland.	41.5955 jaren.	Het Rijk . . .	43.2585 jaren.	Noordholland.	39.6645 jaren.	Overijssel . . .	40.889 jaren.
Zuidholland . . .	41.9825 "	Utrecht . . . . .	43.5985 "	Drenthe . . . . .	39.91 "	Het Rijk . . . . .	40.9865 "
Friesland . . . . .	42.115 "	Overijssel . . . . .	43.9715 "	Zuidholland . . . . .	39.929 "	Utrecht . . . . .	41.36575 "
Zeeland . . . . .	42.4545 "	Gelderland . . . . .	44.735 "	Zeeland . . . . .	39.971 "	Gelderland . . . . .	42.108 "
Groningen . . . . .	42.9365 "	Noordbrabant . . . . .	45.8895 "	Friesland . . . . .	40.06935 "	Limburg . . . . .	43.497 "

Uit dien staat blijkt dat voor de geheele bevolking het betrekkelijk aandeel voor de ongehuwden van beide geslachten het grootst was op 19 November 1849, het kleinste voor die van het mannelijke geslacht op 1 Januarij 1830, van het vrouwelijke op 31 December 1850, voor de gehuwden van beide geslachten het grootst op 31 December 1850, het kleinste op 19 November 1849, voor de weduwen het grootst op 19 November 1849, het kleinste op 1 Januarij 1830, voor de weduwen het grootst op 1 Januarij 1830, het kleinste op 31 December 1850. Door het teken + en - is op den staat duidelijk aangewezen voor welke telling het aandeel het grootst of het kleinste was op elk der zes leeftijden van den staat. Deze staat leert dat naarmate men tot een hooger leeftijd opklimt voor elk der vier volkstellingen zonder eenig onderscheid

het betrekkelijk aandeel toeneemt voor het vrouwelijke, afneemt voor het mannelijke geslacht, en dat de toeneming voor eerstgenoemd geslacht het grootst is voor de hoogste leeftijden. Naar de indeeling naar den burgerlijken staat hebben de ongehuwden het grootste aandeel voor den leeftijd van 0 en meer jaren of voor de geheele bevolking en voor dien van 5 en meer jaren. Het aandeel van het mannelijk geslacht in de ongehuwden is op die beide leeftijden en voor elke telling grooter dan dat van het vrouwelijke geslacht. Van af den leeftijd van 10 en meer jaren wordt het aandeel in de ongehuwden het grootst voor het vrouwelijke geslacht en wordt de overmaat voor dat geslacht grooter naarmate men tot een hooger leeftijds opklimt. Het grootste aandeel hebben voor elk geslacht en voor elke telling de gehuwden op de leeftijden van 16, 20, 50 en meer jaren, de personen in weduwenstaat op dien van 75 en meer jaren en wel zoo dat het vrouwelijke geslacht in dit laatste aandeel deelt voor iets minder dan twee, het mannelijke slechts voor ruim één derde. Terwijl op de leeftijden van 16 en meer, 20 en meer, zoo als van zelf spreekt, het betrekkelijk aandeel voor de gehuwde mannen en vrouwen nagenoeg gelijk is, hebben op de leeftijden van 50 en vooral van 75 en meer jaren de gehuwde mannen een veel grooter aandeel in de bevolking dan de gehuwde vrouwen, een gevolg zoowel van het later trouwen der mannen dan de vrouwen als van het meer hertrouwen der weduenaars dan de weduwen, van waar dan ook de groote overmaat der laatste boven de eersten op elken leeftijd en vooral op de hoogere.

§ 5. Reden der geboren kinderen tot de vrouwen in den leeftijd van 15 tot 54 jaren.

Het jaarlijksch getal wettige en onechte geboorten en hunne onderlinge reden geven de staten van den loop der bevolking, opgenomen in het Statistisch Jaarboek uitgegeven door het Departement van Binnenlandsche Zaken. In het eerste gedeelte van de tiende en elfde jaargangen, bladz. 66 en 68, vindt men voor elke provincie het tienjarig overzicht (1850 tot 1859) dier geboorten, en bladz. 98 een tienjarig overzicht van de wettig en onecht levend geboren en in de voornaamste gemeenten. De reden tot het bevolkingcijfer jaarlijks uit die gegevens opgemaakt geeft niet met volkomen juistheid den graad van zedelijkheid eener bevolking te kennen, dewijl op haar het grooter of kleiner aandeel van het vrouwelijk geslacht op vruchtbaren leeftijd, waartoe als uiterste grenzen 15 tot en met 54 jaren werden aangenomen, een grooten invloed uitoefent.

Uit dien hoofde hebben wij het niet ondienstig geacht het getal vrouwen van 15 tot en met 54 jaren voor elk der beide laatste tellingen naar den burgerlijken staat afzonderlijk op te maken. Ter verkrijging van de reden der wettig geboren kinderen tot de gehuwde vrouwen en van de onecht geboren tot de ongehuwde en tot de ongehuwde en weduwen is het tienjarig cijfer der wettig geboren gedeeld in vijfmaal de som der gehuwde vrouwen, het tienjarig cijfer der onecht geboren in vijfmaal de som der ongehuwde en der ongehuwde vrouwen en weduwen van 15 tot en met 54 jaren naar de uitkomsten van beide tellingen. Die deeling geeft zoo na mogelijk de gemiddelde tienjarige reden der geboren kinderen, wettig en onecht, tot het getal vrouwen, gehuwd en niet of niet meer door den huwelijksband verbonden, te kennen. Op den volgenden staat is de provincie het eerst geplaatst waar, in de reden tot de ongehuwde vrouwen en weduwen, het getal onechte geboorten het grootst is, de volgende in afdalende orde. Ter aanduiding der volgorde van de reden der wettig geboren kinderen tot de gehuwde vrouwen is een volgnummer gebezigd. Het cijfer 1 Zeeland geeft de provincie te kennen, waar de huwelijken het vruchtbaarst zijn of uit het kleinste getal gehuwde vrouwen een duizendtal kinderen wordt geboren.

(1) Hieronder 19 woonplaats onbekend. (2) 30 woonplaats onbekend.

Het verdient opmerking dat de huwelijken het vruchtbaarst zijn in die provincien waar de sterfte onder de kinderen beneden het jaar het grootst is, Zeeland en Zuidholland, waar blijkens de twaalfjarige sterftetabellen (1840 tot 1852) op 10,000 levenden van 0 tot 1 jaar 3246 en 3112 gemiddeld jaarlijks zijn overleden; het minst vruchtbaar in Drenthe en Friesland, waar die sterfte op 10,000 levenden slechts 1508 en 1659 bedroeg. De vruchtbaarheid der huwelijken, aanvulling der slagtoffers in het eerste levensjaar door nieuwe geboorten, is dus een ongunstig verschijnsel en geenszins een bewijs van grootere toeneming der bevolking in die provincien.

De provincien, waarvan het grootste gedeelte der bevolking woont in zeer volkrijke gemeenten, Zuidholland, Noordholland en Utrecht, behooren tot die waar het getal onecht geboren kinderen in de reden tot de niet door het huwelijk verbonden vrouwen van 15 tot en met 54 jaren het grootst is. Ook Zeeland, hetwelk na Zuidholland den eersten rang bekleedt, onderscheidt zich ten dien aanzien ongunstig. De provincien daarentegen, waar de plattelands bevolking het grootst is, Noordbrabant, Limburg, Friesland en Overijssel, geven de meest gunstige reden. Wij hebben het uit dien hoofde niet ondienstig geacht het onderzoek ook uit te strekken tot de meest bevolkte gemeenten en geven hiervan in den volgenden staat een overzicht, waaruit blijkt dat te Dordrecht, waar in het twaalfjarig tijdperk (1840—1852) op tienduizend levenden beneden het jaar 3584 kinderen zijn overleden (het hoogste sterftcijfer in ons land), de huwelijken het vruchtbaarst; te Leeuwarden, waar het getal overledenen beneden het jaar slechts 1754 bedroeg (het laagste cijfer van de 17 voornaamste gemeenten), de huwelijken het minst vruchtbaar zijn. Uit dien staat volgt tevens dat de drie Zuidhollandsche gemeenten, Leijden, 'sGravenhage en Rotterdam, de minst gunstige, Zwolle, Middelburg en Nijmegen de meest gunstige reden geven van de onecht geboren kinderen tot het getal vrouwen van 15 tot en met 54 jaren niet of niet meer door den echt verbonden.

GEMEENTEN. (Communes.)	Ongehuwde vrouwen van 15 tot en met 54 j. (Femmes célibataires de 15 à 54 ans y compris.)		Gehuwde vrouwen van 15 tot en met 54 j. (Femmes mariées de 15 à 54 ans y compris.)		Weduwen van 15 tot en met 54 j. (Veuves de 15 à 54 ans y compris.)		Kinderen geboren van 1850 tot en met 1859. (Naiissances de 1850 à 1859 y compris.)		Wettig. (Légitimes.)	Onecht. (Illégitimes.) § 6. Sterftetabellen.

Het behoort tot de taak van den bewerker der gegevens eener volkstelling zooveel doenlijk praktische uitkomsten uit het werk af te leiden. Wij hebben het uit dien hoofde niet ondienstig beschouwd, met behulp der uitkomsten van de beide laatste tellingen en van de tienjarige sterftetabellen naar den ouderdom voor elk geslacht, eene sterftetafel (staat D achter de inleiding) te berekenen; waarnaast ter vergelijking geplaatst is de sterftetafel destijds opgemaakt uit twaalfjarige sterftetabellen (1840 tot en met 1851) en de uitkomsten der telling in 1849, ook voorkomende bladz. 392 volgende van het werk: *bevolkingstabellen, levens- en sterftewet voor het Koninkrijk der Nederlanden*, in 1856 door het Departement van Binnenlandsche Zaken uitgegeven.

Voor de nieuwe sterftetafel werd voor elk levensjaar vijfmaal de som genomen van de uitkomsten der beide tellingen, waardoor voor elk levensjaar tienmaal de gemiddelde jaarlijkse bevolking gedurende het tienjarig tijdvak werd verkregen. Men beschouwde dus de halve som der bevolking naar den ouderdom, uitkomst der

beide tellingen, als het gemiddelde cijfer der bevolking op elk levensjaar gedurende het tienjarig tijdperk. De tienjarige som der bevolking naar den ouderdom werd vervolgens voor elk levensjaar gedeeld door de tienjarige sterfte naar den ouderdom. De tafels zijn opgemaakt naar de wijze van bewerking destijds door Moser aangeprezen en later door Bernoulli, Quetelet, Farr en andere beoefenaars der bevolkingstatistiek gevolgd. De vergelijking van beide tafelen doet zien, dat voor beide geslachten het onderscheid in sterfte het grootst is voor het eerste levensjaar of van 0 tot 1 jaar en dat ten dien aanzien de tienjarige tafel bij de twaalfjarige ongunstig afsteekt. Voor de drie volgende jaren daarentegen is voor beide geslachten de betrekkelijke sterfte kleiner gedurende het tienjarig tijdperk. Het aantal levenden was grooter en derhalve de sterfte geringer gedurende het twaalfjarig tijdperk bij het mannelijk geslacht gedurende de 23, bij het vrouwelijke gedurende de 49 eerste levensjaren. Voor het mannelijk geslacht is op den tienjarigen staat (1850—1859) het getal levenden grooter van 24 tot 88 jaren, kleiner op de hogere levensjaren; voor het vrouwelijke geslacht staan beide tafelen gelijk op den leeftijd van 50 jaren en geven beide 40565 personen in leven. Van 59 tot 74 jaren is voor het vrouwelijk geslacht de tienjarige tafel min gunstig; van dien leeftijd af tot aan den ouderdom van 80 jaren wordt zij gunstiger, zij wordt op nieuw min gunstig op de hogere levensjaren.

De volgende staat geeft voor elke van beide sterftetaten een overzicht van het getal overledenen op honderd levenden in het eerste levensjaar en vervolgens naar vijfjarige levenstijdperken. De bijgevoegde berekening van het verschil tusschen beide tafelen doet zien dat voor het mannelijke geslacht de betrekkelijke sterfte op de leeftijden van 0 tot 1, 31 tot 35, 51 tot 55 en 81 tot 85, voor het vrouwelijke op die van 0 tot 1, 11 tot 15, 26 tot 40, 51 tot 70, 76 tot 95 grooter was naar den tienjarigen sterftestaat 1850/59 dan naar den twaalfjarigen 1840/51.

GETAL OVERLEDENEN OP HONDERD LEVENDEN VOOR ELK LEVENSTIJDPERK.						
(Statistiek van 100 vivans à chaque période de la vie.)

Gedurende elk van beide tijdperken hebben voorspoedige en noodlottige jaren op de sterftcijfers invloed uitgeoefend. Tot de voorspoedige jaren behooren de tijdperken 1840/45 en 1850/54, vooral de beide jaren 1850 en 1851; tot de noodlottige 1846 en 1847 door schaarschte van levensmiddelen, 1848 en vooral 1849 door het heerschen van den aziatischen braakloop, 1855 door de groote sterfte onder de kinderen als gevolg der mazelen en onder de volwassenen door kwaadaardige koortsen, typhus en aziatischen braakloop, 1857 vooral door buitengewone sterfte onder de kinderen, 1858 en vooral 1859 door pokken en kwaadaardige koortsen, waarbij zich in het laatste jaar de aziatische braakloop voegde.

De gemiddelde en waarschijnlijke leeftijd bij de geboorte geven voor beide geslachten, naar de uitkomsten van beide tafelen, een niet noemenswaardig verschil. Beiden zijn op de tienjarige tafel iets langer voor het mannelijke, iets korter voor het vrouwelijke geslacht. De gemiddelde leeftijd der vrouwen overtreft dien van het mannelijke geslacht op den twaalfjarigen staat met 2.80, op den tienjarigen slechts met 2.81; de waarschijnlijke op den eersten staat met 5.54, op den tweeden slechts met 4.16 jaren.

#### § 7. Vergelijkende beschouwing der bevolking- en sterftetafelen.

Wij hebben naar aanleiding van deze telling zowel bevolking- als sterftetafelen opgemaakt. Een juist begrip van het verschil tusschen beide soorten van tafelen vormt zich slechts een hoogst gering getal personen. Wij achten ons dus verplicht ter voorkoming van het verkeerde gebruik, hetwelk men van die staten pleegt te maken, het verschil tusschen en de strekking van beiden eenigzins nader toe te lichten.

De bevolkingstafel geeft de som der levenden en wordt dus verkregen door op de ouderdomstaten het getal levenden op elken ouderdom op te sommen; het getal levenden 0 en meer jaren oud op de bevolkingstafel is de geheele bevolking. Verlangt men eene bevolkingstafel van en boven een bepaalden ouderdom, dan behoort men slechts het getal levenden van dien ouderdom bij die van alle hogere ouderdomsjaren te tellen. Zoo wordt bijv. eene bevolkingstafel van de bevolking 20 en meer jaren oud verkregen door bij het getal levenden op den ouderdom van 20 jaar het getal levenden 21, 22 enz. jaren oud tot aan het laatste levensjaar te tellen. Het verschil tusschen de bevolkingstafel van af het twintigste levensjaar en de bevolkingstafel voor de geheele bevolking geeft het aandeel der bevolking beneden 20 jaren. Men ziet dus hieruit dat het vervaardigen van eene bevolkingstafel vooral hiertoe dient om het betrekkelijk aandeel der bevolking op elk ouderdomsjaar en op elk levenstijdperk in de geheele bevolking te kennen, om bijv. te weten hoeveel op eene bevolking zich bevinden in den leeftijd van 10 tot 20 of van 20 tot 50 jaren. Ter vergelijking van verschillende bevolkingstafelen, hetzij van gedeelten des Rijks, zoo als in staat B voor elke provincie en voor het Rijk, hetzij van bevolkingen op verschillende tijdstippen, zooals in staat A voor de uitkomsten der vier tellingen, worden de tafelen tot een bepaald tientalig cijfer tien-, honderdduizend of hoger teruggebracht. Bevolkingstafelen, opgemaakt op verschillende tijdstippen of uit eene reeks van volkstellingen, leeren den vóór- of achteruitgang, het grooter of kleiner aandeel op het eene dan op het andere tijdstip van elk gedeelte der bevolking boven en beneden bepaalde levensjaren kennen. Zoo leert men bijv. uit staat A achter deze inleiding dat op tien duizend mannen op 1 Januarij 1830 3911, op 1 Januarij 1840 3978, op 19 November 1849 4142 en op 31 December 1859 naar de feitelijke bevolking 4156, naar de werkelijke 4176 waren op den leeftijd van 20 tot 50 jaren en dat derhalve het betrekkelijk aandeel voor dat gedeelte der mannelijke bevolking sedert 1 Januarij 1830 is toegenomen. Eveneens geeft staat B te kennen dat op 100,000 personen van het mannelijk geslacht men voor Zeeland verkrijgt 43,147 oud 20 tot 50 jaren tegen 40,040 voor Limburg.

Op de sterftetafel is het aantal levenden op elk ouderdomsjaar steeds het overschot van een jaarlijks terugkeerend onveranderlijk getal geboren (honderd duizend op staat D achter deze inleiding). Eene sterftetafel, op honderdduizend jaarlijks geboren over honderd jaren of tot aan de uiterste grens van het menselijke leven berekend, geeft dus het getal levenden of in leven gebleven personen van  $100 \times 100,000$  of tien milioenen geboren. Op de sterftetafel geeft dus de som der levenden of het getal jaren, welke honderd duizend geboren te zamen te leven hebben, het bedrag der gelijktijdig levende bevolking. Men dient echter hierop te letten, dat de overledenen tusschen twee opvolgende jaren op die tafel verondersteld worden allen het hoogste van beide jaren ten volle te hebben bereikt, terwijl werkelijk een gedeelte gestorven is even boven het laagste jaar, anderen op andere tijdstippen tusschen beide jaren. Tot gemak der berekening wordt verondersteld, dat zij gemiddeld slechts het halve jaar op den dag van hun overlijden bereikt hadden, bijv. de overledenen van 0 tot 1 jaar worden verondersteld te zijn gestorven gemiddeld één half jaar, die tusschen 1 en 2 jaren gemiddeld één en één half jaar oud enz. Hieruit volgt dat ter opmaking van eene bevolkingstafel uit de som der levenden of uit het getal jaren nog te leven men voor de geheele bevolkingstafel of de bevolking van 0 en meer jaren van honderd duizend vooraf de helft (vijftig duizend) dient af te trekken, terwijl men op gelijke wijze te werk gaat met het getal levenden op den ouderdom van 20 jaren, wanneer men eene bevolkingstafel voor de bevolking van 20 en meer jaren wenscht te maken. De bevolkingstafel uit eene sterftetafel opgemaakt geeft tevens te kennen het getal jaren hetwelk het getal levenden op den ouderdom van welken de bevolkingstafel uitgaat, te zamen nog te leven hebben. Ter verkrijging van den gemiddelden leeftijd van elken persoon op dien ouderdom of van het getal jaren, hetwelk elk dier personen nog te leven heeft, behoort men slechts het geheele getal jaren of op de bevolkingstafel de geheele bevolking door het getal levenden op dien ouderdom te deelen. Indien bijv. volgens staat D, mannelijke sterftetafel voor 1850/59 honderd duizend levenden bij de geboorte te zamen gemiddeld te leven hebben 3,362,465 jaren, dan heeft één levende te leven  $\frac{3,362,465}{100,000}$  jaren of 33.62465 jaren. Zoo hebben bijv. volgens dienzelfden staat op 20jarigen leeftijd 56,287 levenden te zamen nog te leven 2,125,325 jaren, waaruit volgt dat elk levende op 20jarigen ouderdom nog te leven heeft  $\frac{2,125,325}{56,287}$  of 37.7587 jaren en dus gemiddeld op een leven van  $20 + 37.7587$  of 57.7587 jaren mag rekenen.

Het getal levenden op elk ouderdomsjaar van eene bevolkingtafel, afgeleid uit den ouderdomstaat eener volkstelling of eener getelde bevolking, welk getal verkregen wordt door aftrekking der overlevenden op een hooger ouderdomsjaar van de overlevenden op het daaraan onmiddellijk voorafgaande lagere, is het overschot van voor elk geboortjaar verschillende geboortecijfers; terwijl dit getal levende op de bevolkingtafel, afgeleid uit de sterftetafel, telkens het overschot is van hetzelfde getal geboren, honderd duizend op de sterftestaten voorkomende op staat D. Wanneer, zoo als hier te lande, het geboortecijfer in den regel jaarlijks toeneemt, zal op de bevolkingtafel uit de sterftetafel opgemaakt het getal overlevenden van af 1 en meer jaren steeds grooter zijn dan dat op de bevolkingtafel afgeleid uit den ouderdomstaat eener volkstelling, zooals blijkt uit de volgende vergelijking van de bevolkingtafel voor elk geslacht, afgeleid uit de twaalf- en tienjarige sterftetafelen, met die ontleend aan den ouderdomstaat der werkelijke bevolking op 31 December 1859.

OUD (Age des)	BEVOLKINGTAFEL AFGELEID UIT: (Table de population déduite de.)					
	DE STERFTETAPEL 1840/51. (Le table de mortalité 1840/51.)		DE STERFTETAPEL 1850/59. (Le table de mortalité 1850/59.)		DE WERKELIJKE BEVOLKING NAAR DEN OUDERDOM OP 31 DEC. 1859. (Le population réelle par Age au 31 Dec. 1859.)	
	M. (Hommes.)	V. (Femmes.)	M.	V.	M.	V.

80 " " "	527.5	690.3	559.4	677.5	383	510

De helft der bevolking of op honderd duizend vijftig duizend *boven* en vijftig duizend *beneden* eenen bepaalden leeftijd wordt verkregen: voor de mannelijke bevolking op de bevolkingtafel afgeleid uit de twaalfjarige sterftetafel (1840/51) op den leeftijd van 27.7328 jaren, op die uit de tienjarige (1850/59) op dien van 28.224, op de bevolkingtafel, welke de werkelijke bevolking naar den ouderdom op 31 December 1859 tot grondslag heeft, op 23.73725 jaren, voor de vrouwelijke bevolking op elk der drie tafelen op 23.2603, 23.71 en 24.343 jaren.

De helft der bevolking wordt dus op de bevolkingtafel uit de volkstelling afgeleid voor de mannelijke bevolking verkregen op een jongeren leeftijd van 3.99555 jaren dan op de bevolkingtafel afgeleid uit de twaalfjarige en van 4.48675 dan op die uit de tienjarige sterftetafel; voor de vrouwelijke op een jongeren van 3.4173 en 3.867 jaren.

Wanneer jaarlijks niet slechts de bevolking toeneemt maar tevens het geboortecijfer grooter wordt, is het getal overgebleven personen op den hoogsten leeftijd het overschot van het kleinste geboortecijfer. De bevolkingtafel afgeleid uit de volkstelling zal dan, vergeleken met die afgeleid uit de sterftetafelen, het grootste verschil in minder geven op de hoogste leeftijden. Dat zulks in ons vaderland het geval is blijkt uit de volgende berekening op honderd, afgeleid uit den voorgaanden staat.

OUD (Age des)	Overlevenden naar de bevolkingtafel afgeleid uit de volkstelling op honderd overlevenden op elken leeftijd naar de bevolkingtafel afgeleid uit beide sterftetafelen. (Nombre de survivants d'après le table de population déduite du recensement sur cent survivants à chaque âge d'après les tables de population déduites des deux tables de mortalité.)			
	1840/51.		1850/59.

Geeft de bevolkingtafel den toestand of het betrekkelijk aandeel van elk bestanddeel der bevolking op een bepaald tijdstip, de sterftetafel *meet* de lengte van het menselijke leven. Beide sterftetafelen toonen aan dat de lengte van het vrouwelijke leven grooter is dan die van het mannelijke. Die meting heeft echter geene *volstrekte*, zij heeft slechts eene *betrekkelijke* waarde. Eene waarde welke toeneemt, naarmate de waarneming zich uitstrekt over een grooter bevolkingcijfer en over een grooter getal sterftejaren. Zoo heeft eene sterftetafel van de bevolking van een geheel rijk meer waarde dan die van ééne provincie of ééne enkele gemeente, eene sterftetafel waarnemende eene *twaalfjarige* sterfte meer waarde dan die welke slechts eene *één* of *tweejarige* sterfte waarneemt. De waarde eener sterftetafel hangt daarenboven af van de deugd en van de gelijksoortigheid van hare bestanddeelen. Ter verkrijging eener volledige sterftetafel wordt vereischt dat men eene volledige opgave bezit van het getal overledenen en van het ouderdomsjaar tijdens het overlijden. Eene sterftetafel, welke als bouwstof voor de sterfte bezit de registers van den burgerlijken stand, zoo als hier te lande, heeft dus meer waarde dan sterftetafelen van landen, welke die bouwstof missen. Eveneens verhoogt of verlaagt de meerdere of mindere nauwkeurigheid en volledigheid van de opgaven der volkstelling de waarde eener sterftetafel. Daar eene bevolking niet slechts aan de overmaat der geboren boven de overledenen en aan die der overledenen boven de geboren hare toeneming en afnemering verschuldigd is, maar vestiging uit en verhuizing naar het buitenland hierop invloed uitoefenen, de overledenen niet allen geboren zijn in het binnenland en omgekeerd niet alle geboren binnen de grenzen des rijks komen te overlijden, zoo ontnemen ook deze omstandigheden aan de sterftetafel een deel van hare volstrekke waarde. Zulks neemt echter niet weg, dat de betrekkelijke waarde eener sterftetafel groot blijft. Die waarde wordt verhoogd wanneer men hare gegevens kan vergelijken met die van sterftetafelen afgeleid uit de sterfte op vroegere tijdperken. Men verzuime dus niet bij elke nieuwe volkstelling eene nieuwe sterftetafel der bevolking op te maken. Zoo leeren bijv. reeds de voor ons vaderland bestaande waarnemingen, dat de meerdere of mindere sterfte in de eerste levensjaren op de gemiddelde levenslengte der bevolking een grooten invloed uitoefent; men behoeft hiertoe slechts te raadplegen de sterftetafelen voorkomende bladz. 167 en volgende van het werk "bevolkingtafelen" enz. in 1856 door het Departement van Binnenlandsche Zaken uitgegeven, waaruit het groote verschil in levensduur der bevolking van de verschillende provincien en van de voornaamste gemeenten, van die in de vroegere steden en de gemeenten ten platten lande kan worden opgemaakt. Uit die staten blijkt onder anderen dat de mannelijke plattelands bevolking in Gelderland (de meest gunstige provincie) naar de twaalfjarige sterfte in 1840/51 gemiddeld leeft 42.41, de vrouwelijke plattelands bevolking in Friesland 44.18, in Zeeland daarentegen (de minst gunstige provincie) de mannelijke bevolking slechts 26.82, de vrouwelijke 29.23 jaren; zoodat naar die sterfte honderdmaal tienduizend of één miljoen geboren jongens geven in Gelderland eene gelijktijdig levende mannelijke bevolking van 424,100, in Zeeland slechts van 268,166, een gelijk getal geboren meisjes in Friesland eene gelijktijdig levende vrouwelijke bevolking van 441,752, in Zeeland slechts van 292,325. Nog grooter wordt het verschil bij vergelijking van de bevolking der vroegere steden. De voor de bevolking in de steden meest gunstige provincien Drenthe en Limburg geven een gemiddelden leeftijd, de eerste voor het mannelijke geslacht van 37.95, de laatste voor het vrouwelijke van 40.34 jaren, zoodat in de eerste provincie van één miljoen gedurende honderd jaren geboren jongens gelijktijdig in leven zouden zijn 379,504, in de laatste van een gelijk getal geboren meisjes 403,432. De voor de bevolking in de steden minst gunstige provincien Noord- en Zuidholland geven een gemiddelden leeftijd de eerste voor het mannelijke geslacht van 24.16, de laatste voor het vrouwelijke van 29.36 jaren; men verkrijgt dus op voornoemd getal geboren in de eerste provincie gelijktijdig levend 241,044 mannen, in de laatste 293,595 vrouwen. Uit die voorbeelden volgt dat een toenemend geboortecijfer geen onfeilbaar kenmerk is eener toenemende bevolking, daar die toeneming niet slechts van het geboortecijfer maar tevens en hoofdzakelijk van de meerdere of mindere toeneming in levensduur afhankelijk is. Zoo kan bijv. eene bevolking wier geboortecijfer jaarlijks toeneemt bij vermindering van levensduur afnemen, eene bevolking met een jaarlijks gelijk getal geboren of waar zelfs het geboortecijfer jaarlijks afneemt bij toenemenden levensduur toenemen. De waarde der geboren is geheel afhankelijk van den gemiddelden duur van hun leven. Eene eenvoudige evenredigheid

$$268,166 : 424,100 = 10,000 : x$$

$$x = \frac{424,100 \times 10,000}{268,166} = 15,815.$$

doet zien, dat ten platten lande van Gelderland tien duizend gedurende honderd jaren jaarlijks levendgeboren jongens dezelfde waarde hebben of hetzelfde getal gelijktijdig levende mannen geven als 15,815 gedurende honderd jaren jaarlijks levendgeboren jongens in Zeeland, zoodat ten platten lande van Gelderland reeds één miljoen, ten platten lande van Zeeland eerst 1,581,500 mannelijke geboorten eene gelijktijdig levende bevolking geven van 424,100 mannen. Naar diezelfde berekening wordt eene gelijktijdig levende bevolking van 441,752 vrouwen verkregen ten platten lande van Friesland uit 100 x 10,000 of 1,000,000 levendgeboren meisjes tegen 100 x 15,112 of 1,511,200 ten platten lande van Zeeland. Waar het jaarlijksch getal geborenen in de reden tot de bevolking gering is, de gemiddelde levensduur daarentegen hoog, is het betrekkelijk aandeel der volwassen bevolking steeds hooger dan bij die bevolkingen, welke, bij een korten gemiddelden levensduur der bevolking, jaarlijks door een groot aantal geboorten worden voltallig gehouden. Naar de twaalfjarige sterftestaten telde

men op honderd duizend mannen ten platten lande van Gelderland 64,516, ten platten lande van Zeeland slechts 61,549, op honderd duizend vrouwen ten platten lande van Friesland 64,440, ten platten lande van Zeeland slechts 62,674 die den twintigjarigen leeftijd bereikt hadden. De voormalige steden van Noordholland geven op voornoemd getal 57,281 mannen, de voormalige steden van Zuidholland 63,841 vrouwen van en boven twintig jaren. Men ziet dus hieruit, dat verlenging van den gemiddelden levensduur door verbetering van den gezondheidstoestand of het wegruimen van schadelijke invloeden vooral in de eerste levensjaren niet slechts bijdraagt tot vermeerdering eener bevolking, maar tevens tot meerdere ontwikkeling van hare kracht of tot vermeerdering van het betrekkelijk aandeel van het volwassen gedeelte der bevolking en dat het bezit van sterftetabelen een krachtig hulpmiddel is ter bevordering der kennis van den toestand eener bevolking en ter opsporing der middelen ter verbetering van dien toestand.

### TWEDE GEDEELTE.

De opgave der beroepen of middelen van bestaan heeft ook bij deze telling te wenschen overgelaten. Op het inschrijvingbiljet waren voor de invulling van de maatschappelijke betrekking drie kolommen bestemd, waarvan de ééne ter invulling van het ambt door den persoon bekleed, terwijl het beroep of bedrijf, naar mate het zelfstandig of in de hoedanigheid van meester, als dienende of in de hoedanigheid van knecht werd uitgeoefend, in eene der beide overige kolommen moest worden ingevuld. Vooral de laatste splitsing in twee kolommen is niet begrepen, zoodat men dikwijls knechts of werklieden in de kolom voor meesters bestemd en omgekeerd heeft ingevuld gevonden. Daar in de meeste opgaven de woorden meester of knecht bij het beroep niet gevoegd waren was het ondoenlijk, althans voor de meeste provincien, beiden volledig te splitsen en zag men zich uit dien hoofde genoodzaakt in den algemeenen beroepstaat voor het Rijk, bladz. 384 volgende, de onderscheiding geheel weg te laten. Ter voorkoming van dit gebrek acht men het raadzaam dat bij volgende tellingen bepaaldelijk worde afgevraagd of men bij of voor anderen werkzaam of in dienst is, eene vraag welke met eenvoudig ja of neen kan worden beantwoord. Over het algemeen is niet genoegzaam gelet op het voorschrift achter het biljet om de bijzondere tak van landbouw, fabrieknijverheid of handel, de soort van het ambacht of handwerk duidelijk te onderscheiden en is even als bij de vorige telling vooral veel misbruik gemaakt van de algemeene benaming arbeider of werkmans. Deze telling geeft naar de werkelijke bevolking 238,277 (1) arbeiders en arbeidsters, 190,858 mannen, 47,419 vrouwen, welke deels tot de landbouwers, deels tot de fabriekarbeiders, deels tot den handel kunnen gerekend worden te behooren.

Vooral in de invulling der beroepen door den landbouwenden stand bestond eene groote ongelijkmatigheid. Terwijl in enkele gemeenten alle leden van het gezin, tot zelfs de jongste kinderen, als landbouwers op het biljet voorkwamen, werd in andere regelmatig slechts het hoofd als landbouwer opgegeven, de overige leden van het gezin met "zonder" ingevuld. Het gevolg hiervan was dat in enkele provincien slechts een zeer gering, in andere een groot aantal vrouwen onder de afdeling "landbouw en veeteelt" op den beroepstaat voorkomt, en dat hierdoor het betrekkelijk aandeel voor het getal vrouwen zonder beroep veel grooter is in de ééne, dan in de andere provincie. Van de rubriek "zonder beroep" wordt bij het maken van eenen beroepstaat niet zelden misbruik gemaakt om de personen, welke verzuimd hebben hun beroep of middel van bestaan op te geven, gemakshalve hieronder te plaatsen. De beroepstaten zijn ook uit dien hoofde veel minder volledig dan de ouderdomstaten, waar men bij verzuim van opgave van den ouderdom steeds verplicht is het biljet ter aanvulling terug te zenden.

Hoewel bij deze telling even als bij de vorige was voorgeschreven, dat van hem die meer dan een beroep of bedrijf uitoefent slechts het voornaamste wordt opgegeven, geeft het gelijktijdig uitoefenen van verschillende beroepen groote moeilijkheid bij het verzamelen der opgaven. Wij zullen trachten dit door het volgende voorbeeld te staven: personen die gewoon zijn diensten als oppasser of als boodschaplooper te verrigten hebben dikwijls in hunne tusschenuren een ander middel van bestaan aan de hand; zij lappen schoenen of herstellen kleederen en geven zich, daar dit beroep hun het meest eervol voorkomt, op als schoenmaker of kleermaker, van waar men dan ook gewoonlijk bij de tellingen een groot getal personen verkrijgt welke die beroepen uitoefenen, zonder dat hieruit kan worden opgemaakt dat het schoen- of kleermakersbedrijf een groot middel van bestaan in de gemeente of in de provincie uitmaakt. Er bestaan daarentegen andere beroepen, welke als minder eervol in den regel worden verzwegen en onder verdichte benamingen kroeghouder, tapper, kroeghoudster, tapster, of ook wel als zonder worden opgegeven. Uit die opmerkingen volgt dat de cijfers der beroepstaten met behoedzaamheid moeten worden geraadpleegd.

Even als de ouderdomstaten zijn de beroepstaten voor de voornaamste gemeenten, elke provincie en het Rijk naar de feitelijke en de werkelijke bevolking opgemaakt. Terwijl bij de vorige telling de indeeling naar den ouderdom zich bepaalde tot de personen beneden de 10, van 10 en 11, van 12 tot 16 en van 16 jaren en daarboven, heeft men bij deze telling eene nieuwe splitsing naar den ouderdom van 16 tot 23 jaren er bijgevoegd, zoodat men thans een volledig overzicht verkrijgt van de beroepen of middelen van bestaan der minder- en meerderjarige bevolking. Bij de vorige telling waren de beroepen zonder onderscheiding in alpha-

(1) Bladz. 301 staat: 36419 arbeiders en 23727 arbeiders van beide geslachten, leez: 17419 en 23627. Het totaal voor de verschillende beroepen wordt hierdoor op bladz. 303. 18019 en 219281 in plaats van 17019 en 219281.

betreft op den beroepstaat gerangschikt. Bij deze telling heeft men eene meer wetenschappelijke orde gevolgd door de beroepen tot bepaalde klassen terug te brengen. Eene indeeling der beroepen naar klassen blijft nochtans steeds onvolledig en gebrekkig, dewijl verscheidene beroepen onder meer dan ééne klasse kunnen worden gerangschikt, andere daarentegen, wil men de indeeling niet te ver uitstrekken, moeilijk onder de ééne of andere klasse kunnen gebragt worden. Men is uit dien hoofde verplicht geweest bij de beroepen, welke tot meer dan eene klasse behooren, te verwijzen naar de klasse waaronder zij gebragt zijn en tevens drie klassen aan te leggen voor verschillende takken van nijverheid, handel van verschillenden aard en verschillende beroepen. De beide eerste klassen: landbouw en veeteelt en delfstoffen geven de personen, welke de grondstoffen leveren, hetzij door voortplanting of voortteeling, hetzij door die uit den grond te delven. Met de verwerking der grondstoffen of de ambachts- en fabrieknijverheid houden zich bezig de personen onder de twaalf volgende klassen van den beroepstaat opgenomen; terwijl de personen van de acht hierop volgende klassen de grondstoffen, verwerkt of niet verwerkt, verruilen en in handen brengen van de verbruikers. De overige klassen van den beroepstaat, als algemeen bestuur en algemeene dienst, zijn door de bewoordingen der hoofden duidelijk aangewezen en behoeven geene verdere toelichting.

De Staat E achter deze inleiding geeft voor de feitelijke en de werkelijke bevolking de reden van elke beroepsklasse op honderd duizend personen van elk geslacht, voor elke provincie en voor het Rijk, terwijl tevens op dien staat door de teekens + en - vóór de cijfers wordt te kennen gegeven in welke provincie in de reden tot de bevolking het aandeel voor de beroepsklasse het grootst en het kleinst is. De volgende staat geeft hiervan voor de werkelijke bevolking eene nadere aanwijzing:

Uit dien staat blijkt dat op den leeftijd van 0 tot 10 jaren op de honderd jongens 35, op honderd meisjes 32 onderwijs genoten en dat van de duizend jongens 1.5, van de duizend meisjes 1 ambachten of beroepen uitoefenden, welke zich hoofdzakelijk tot de manufakturen, den landbouw en de huisdienst bepaalden. Op den leeftijd van 10 en 11 jaren genoten op de honderd jongens nagenoeg 65.9, op de honderd meisjes 57.7 onderwijs, terwijl van de eersten 4 van de laatste 2 verschillende beroepen uitoefenden. Zij hadden voor de jongens hoofdzakelijk betrekking tot den landbouw, de manufakturen, leder- en tuigwerk en verschillende beroepen; voor de meisjes tot kleding en manufakturen en de huisdienst. Op dien van 12 tot 16 jaren ontvingen op de honderd jongens 24.5, op de honderd meisjes 17.5 onderwijs, terwijl van de eersten nagenoeg 36, van de laatste 14.6 in een ambacht of beroep werkzaam waren. Op dien leeftijd betroffen de beroepen door de jongens uitgeoefend voor meer dan één vijfde den landbouw, van de overige beroepsklassen hadden het grootste aandeel de houtbewerking, de verschillende beroepen, leder- en tuigwerk, manufakturen en gebouwen en scheepsbouw, terwijl van de meisjes nagenoeg de helft huisdiensten verrichtten en van de overige de meesten tot vervaardiging van kledingstoffen of in manufakturen werden gebezigd. Op de leeftijden van 16 tot 23 en van 23 jaren en daarboven maken landbouw en veeteelt het voornaamste middel van bestaan uit voor het mannelijke geslacht 16.7 en 20.5 op de honderd; hierop volgen het vervoer 4.6 en 6.2, de houtbewerking 4.7 en 4.7, de voeding 3.7 en 4.5, gebouwen en scheepsbouw 3.5 en 2.4, krijgs- en zeevaart 4.6 en 1.7, huisdienst 4.2 en 2.4 op de honderd. Onder de middelen van bestaan der vrouwen bekleedt de

huisdienst op die leeftijden de voornaamste plaats; op dien van 16 tot 23 jaren 24, op dien van 23 en en meer jaren 8.1 op de honderd. Van de overige beroepsklassen geven voor elk van beide leeftijden kleding 4, landbouw 2.6 en 3.1, verschillende beroepen 3.4 en 4.3 op de honderd. De volgende staat geeft voor elk geslacht het betrekkelijk aandeel der personen van elk der vijf leeftijdperken, waarin de beroepstaat is ingedeeld in elke beroepsklasse. Ten einde het overzicht gemakkelijker te maken zijn de beroepsklassen voor het mannelijke geslacht in dier voege gerangschikt dat die klassen het eerst geplaatst zijn, waarin de personen op de jongste leeftijden het grootste aandeel hebben, terwijl voor het vrouwelijke geslacht die rangschikking door een volgnummer is aangewezen.

Op bladz. 404 en volgende van dit deel is de indeeling naar de beroepen of middelen van bestaan van de op den dag der telling tijdelijk aanwezigen, wonende in eene der Nederlandsche kolonien en in den vreemde, afzonderlijk opgemaakt. Uit dien staat blijkt, dat van de mannen wonende in den vreemde de grootste helft 1174 op 2081 in den handel een middel van bestaan vond, waaronder 979 schippers en koopvaardijmatrozen. Van de 209 mannen wonende in de kolonien waren 36 ambtenaren en 36 krijgslieden, vermoedelijk met tijdelijk verlof hier te lande aanwezig. De tijdelijk aanwezige vrouwen zijn voor verreweg het grootste gedeelte zonder beroep opgegeven.

ALGEMEEN OVERZICHT DER VIER TIENJARIGE VOLKSTELLINGEN NAAR DEN OUDERDOM EN DEN BURGERLIJKEN STAAT.

M A N N E N. (Hommes.)

BEVOLKINGSTAFELN VOOR ELKE  
(Tables de population de)

Table with columns for age groups (0 en meer jaren to 100) and provinces (Noord-Brabant, Gelderland, Zuidholland, Noord-holland, Zeeland, Utrecht, Friesland, Overijssel, Groningen, Drenthe, Limburg, Het Rijk). It contains population data for the male population (Mannelijk geslacht).

LEVENSTUJPERKEN  
(Durations de la vie.)

Table showing life expectancy (Levenstijperken) for various age groups from 0 to 80+ years, with columns for each province and the national average.

REDEN AFGELEID UIT  
(Raisonnés déduits de)

Table showing derived reasons (Reden afgeleid uit) for life expectancy, with columns for each province and the national average.

PROVINCIE EN VOOR HET RIJK.  
(chaque province et du Royaume.)

Table with columns for age groups (0 en meer jaren to 100) and provinces (Noord-Brabant, Gelderland, Zuidholland, Noord-holland, Zeeland, Utrecht, Friesland, Overijssel, Groningen, Drenthe, Limburg, Het Rijk). It contains population data for the female population (Vrouwelijk geslacht).

DE BEVOLKINGSTAFEL.  
(La table de population.)

Table showing the total population (De bevolkingstafel) for various age groups from 0 to 80+ years, with columns for each province and the national average.

LEVENSTUJPERKEN  
(Durations de la vie.)

Table showing life expectancy (Levenstijperken) for various age groups from 0 to 80+ years, with columns for each province and the national average.

OUDERDOMSJAREN DER MANNEN
(Age des hommes)
op honderd van elk levensjaarperk.
(sur cent de chaque période.)

Table with 18 columns for age groups (15-20 to 80+) and 18 rows for provinces (Noordbrabant, Gelderland, Zuid-holland, Noord-holland, Zeeland, Utrecht, Friesland, Overijssel, Groningen, Drenthe, Limburg, Het Rijk). Each cell contains a numerical value representing the percentage of the population in that age group.

OUDERDOMSJAREN DER VROUWEN
(Age des femmes)
op honderd van elk levensjaarperk.

Table with 18 columns for age groups (15-20 to 80+) and 18 rows for provinces (Noordbrabant, Gelderland, Zuid-holland, Noord-holland, Zeeland, Utrecht, Friesland, Overijssel, Groningen, Drenthe, Limburg, Het Rijk). Each cell contains a numerical value representing the percentage of the population in that age group.

STERFTETAPELEN VOOR HET KONINGRIJK DER NEDERLANDEN.

Table with columns for OUDERDOM (Age), MANNELIJK GESLACHT (Male), and VROUWELIJK GESLACHT (Female). Rows show mortality statistics from 0 to 50 years of age, including death rate per 100,000, number of survivors, and average life expectancy.

Table with columns for OUDERDOM (Age), MANNELIJK GESLACHT (Male), and VROUWELIJK GESLACHT (Female). Rows show mortality statistics from 51 to 100 years of age, including death rate per 100,000, number of survivors, and average life expectancy.

## BIJLAGE.

Terwijl van de tien overige provincien de uitkomsten der eerste algemeene volkstelling op 1 Januarij 1830, hoewel zeer beknopt, zijn opgenomen in het jaarboekje, uitgegeven op last van Z. M. den Koning over 1831, bladz. 122 en volgende, ontbraken die opgaven tot nu toe geheel voor de provincie Limburg, eene leemte wier aanvulling door de beoefenaars der statistiek in ons vaderland reeds meermalen dringend verzocht is. Door de ijverige bemoeijingen van den heer J. P. L. Thiel, commies ter provinciale griffie en hoofd der afdeeling statistiek in Limburg, is het na een opzettelijk onderzoek in verscheiden gemeentearchieven gelukt de leemte, op enkele niet noemenswaardige uitzonderingen na, aan te vullen. De grootste zwaarigheid bestond in het verkrijgen van het juiste bevolkingcijfer voor die gemeenten, waarvan krachtens de verdragen gedeelten aan België zijn verbleven. Zulks was het geval met de volgende gemeenten:

*Grevenbicht*, waarvan het gehucht Boijen, hetwelk in 1840 112 zielen telde, krachtens het tractaat van 19 April 1839 aan België is verbleven; terwijl daarentegen aan die gemeente, bij resolutie van de Staatsraden Commissarissen van 23 Julij 1840, werd toegevoegd het landgoed en gehucht Danielsweert, (op 1 Januarij 1840 met eene bevolking van 7 zielen), vroeger een gedeelte van de tegenwoordige Belgische gemeente Eelen.

*Horst*. Deze gemeente bestond in 1830 uit de dorpen Horst en Sevenum, bij besluit van den prefekt van het Departement der Roer, van 24 brumaire jaar IX tot ééne municipaliteit vereenigd, bij de Belgische wet van 13 Junij 1836 en thans nog gesplitst in de gemeenten Horst en Sevenum.

*Hunsel*, waarvan bij het verdrag van 5 November 1842 het gehucht Beersel, op 1 Januarij 1840 met 119 zielen, aan België is verbleven.

*Ittervoort*, waarvan bij voornoemd verdrag de gehuchten Beersel of Molenbeersel (op 1 Januarij 1840 met 81 zielen) en Winkel (op dat tijdstip met 37 zielen) aan België zijn verbleven.

*Neeritter*. Van deze gemeente zijn sedert 1830 de gehuchten Beersel met 416, Manestraat en Boomstraat (te zamen met 239 zielen op 1 Januarij 1840) en de pachthoeven Laak en Engeleveld, twee huisgezinnen waarvan het getal personen onbekend is gebleven, met België vereenigd, terwijl daarentegen bij deze gemeente werd gevoegd de pachthoeve Huikenhof, bewoond door één gezin, waarvan het getal personen onbekend, welke vroeger tot de Belgische gemeente Kessenich behoorde.

Op den staat der bevolking van elke gemeente komt onder het arrondissement Maastricht voor de gemeente *Vroenhoven*, van deze gemeente zijn de gehuchten Montenaeken en Heukelom aan België, het gehucht Wilre of Wolder aan Nederland gebleven. Het Belgische gedeelte telde op 31 December 1839 686 zielen.

Bij besluit van den Staatsraad buitengewoon Commissaris des Konings in Limburg van 18 Julij 1839 werd eene nieuwe gemeente *Oud-Vroenhoven* gevormd, uit gedeelten van de gemeenten Lanaken, Veltwezelt en Vroenhoven, gelegen binnen 1200 vademem rondom de vesting Maastricht op den linker maasoever, krachtens art. 4 laatste lid van het tractaat van 19 April 1839 tot het Nederlandsch grondgebied behoorende. Bij Z. M. besluit van 8 Junij 1843 werd tevens aan deze gemeente toegevoegd het aan den linkeroever van de rivier de Jeker gelegen grondgebied van Canne, behelzende het kasteel van Nedercanne, hetwelk bij voornoemd besluit van 18 Julij 1839 voorloopig met de gemeente St. Pieter was vereenigd. Het grondgebied van Canne, aan den rechteroever van de rivier gelegen, bleef aan de gemeente St. Pieter. De bevolking der gemeente *Oud-Vroenhoven* bestond op 1 Januarij 1840 uit 1461 zielen, waarvan 904 tot het gehucht Wilre (vroeger gemeente Vroenhoven), 152 tot dat van Caberg, 394 tot dat van Smeermaas (beiden vroeger gedeelten der gemeente Lanaken) en 11 tot het afgestane gedeelte van de gemeente Veltwezelt behoorden. Het grondgebied dier gemeente werd op nieuw gewijzigd bij het verdrag op 5 November 1842 tusschen de Nederlandsche en Belgische gevolmagtigden gesloten (Wet van 4 Februarij 1843, Staatsblad n°. 3, art. 10). De bevolking der gemeente bedroeg op 1 Januarij 1844 slechts 1100 zielen, waarvan 830 tot het dorp Wilre of Wolder, 126 tot het gehucht Caberg, 125 tot Smeermaas, 11 tot het afgestane gedeelte van Veltwezelt en 8 tot Canne behoorden.

*Roosteren*. Aan deze gemeente werd bij resolutie van de Staatsraden Commissarissen van 2 September 1839, later bevestigd bij de artikelen 9 en 10 van Z. M. besluit van 20 Maart 1844, toegevoegd het gehucht Visserweert, op 1 Januarij 1840 met 92 zielen.

*Stramproij.* Bij het verdrag van 5 November 1842 zijn van deze gemeente twee huizen, zielental onbekend, aan België overgegaan.

De leemten bepalen zich dus hiertoe, dat van de toenmalige dorpen Horst en Sevenum, welke thans twee afzonderlijke gemeenten vormen, geene afzonderlijke opgave der bevolking naar de volkstelling van 1829 kan worden gegeven en dat voor de enkele huizen, die van België naar Nederland zijn overgegaan en omgekeerd het zielental onbekend is; terwijl van de bevolking der toenmalige gemeente Vroenhoven het Belgische gedeelte zou moeten worden afgetrokken.

Daar bij de volkstellingen in 1839 en 1849 de bevolking der vijf voormalige steden en die van de gemeenten ten platten lande voor elk der beide arrondissementen afzonderlijk is opgegeven, is ook bij deze opgave der Limburgsche volkstelling in 1829 dezelfde orde gevolgd. Hierbij dient opgemerkt te worden dat de gemeenten Nieuwstad en Susteren tot 1841 tot het arrondissement Roermond behoorden. Beide gemeenten werden bij de wet van 18 September 1841 (Staatsblad n°. 33) bij het arrondissement Maastricht gevoegd.

Onder de bevolking van Maastricht, Roermond en Venlo is de sterkte der bezetting begrepen. Zij bestond voor de eerste gemeente uit 2326, voor de tweede uit 166 onderofficieren en manschappen; voor Venlo is enkel bekend dat het garnizoen bestond uit 667 personen, met inbegrip van vrouwen en kinderen der militairen.

Op bladz. 82 volgende, van de staten van de bevolking der steden en gemeenten van het Koninkrijk der Nederlanden op 1 Januarij 1840, in 1841 ter Algemeene Landsdrukkerij uitgegeven, vindt men de opgaven der bevolking van tien provincien op 1 Januarij 1830 en op 1 Januarij 1840, de vergelijking tusschen beide tijdperken ontbreekt voor Limburg en voor het Rijk. Ter aanvulling dier leemte geven wij voor de elf provincien en het rijk een overzicht van de uitkomsten der eerste volkstelling op 16 November 1829, naar den stand der bevolking op 1 Januarij 1830.

Voor de eerste volkstelling is slechts door den druk bekend gemaakt een algemeene staat naar den ouderdom voor tien provincien, waarbij de inwoners naar het geslacht zonder onderscheiding van den burgerlijken staat zijn ingedeeld; die staat komt voor in voornoemd jaarboekje over 1832, bladz. 117. Voor de tweede tienjarige volkstelling zijn de staten naar het geslacht en den burgerlijken staat in de in 1841 ter Landsdrukkerij uitgekomen staten dier telling opgenomen voor tien provincien. Voor Limburg en voor het Rijk werd de staat slechts opgemaakt voor elk geslacht, zonder onderscheiding naar den burgerlijken staat. Daar die staten tot de meest belangrijke en meest praktische uitkomsten eener volkstelling behooren, hebben wij het niet ondienstig geacht die leemten zooveel doenlijk te herstellen. Bij de bewerking is men bij de eerste telling of die van 1829 in twee provincien op bezwaren gestuit, welke het niet doenlijk was uit den weg te ruimen. Voor Noordbrabant ontbreekt de indeeling naar den ouderdom van de militairen en hunne gezinnen en van de gevangenen. Men heeft die personen volgens de indeeling naar den burgerlijken staat aan den voet van den staat geplaatst onder de onbekenden. Hun getal bedroeg 6667, 5756 mannen en 911 vrouwen. Onder de eersten telde men 5145 ongehuwden, 548 gehuwden en 63 weduwenaars, onder de laatste 545 ongehuwden, 346 gehuwden en 20 weduwen. Voor Noordholland geeft de staat naar den ouderdom en den burgerlijken staat 189 personen, 40 mannen en 149 vrouwen, minder dan het totaal van den staat der bevolking van elke gemeente dier provincie. Dit verschil spruit hieruit voort dat voor de gemeente Amsterdam de bevolkingstaat

naar de uitkomsten op den dag der telling, 16 November 1829, de ouderdomstaat naar den stand der bevolking op 1 Januarij 1830, werd opgemaakt. De volgende staat geeft naar het geslacht en den burgerlijken staat voor Amsterdam en voor de geheele provincie het verschil op beide tijdperken:

	MANNELIJK GESLACHT.				VROUWELIJK GESLACHT.				
	Ongeh.	Geh.	Wed.	TOTAAL.	Ongeh.	Geh.	Wed.	TOTAAL.	
Amsterdam.	16 November 1829 . . . . .	58441	38412	3479	90332	66126	33580	12326	112032
	1 Januarij 1830 . . . . .	58644	38252	3396	90292	66247	33462	12174	111888
	Vershil op 1 Jan. 1830	+ 203	- 160	- 83	- 40	+ 121	- 118	- 152	- 149
Provincie Noordholland.	16 November 1829 . . . . .	117771	68173	8220	194164	129812	68276	21736	219824
	1 Januarij 1830 . . . . .	117974	68018	8187	194124	129938	68158	21584	219675
	Vershil op 1 Jan. 1830	+ 203	- 160	- 83	- 40	+ 121	- 118	- 152	- 149

Voor de tweede tienjarige volkstelling zijn de staten naar den ouderdom en naar den burgerlijken staat in overstemming met de totalen der bevolking van de gemeenten voor alle provincien, behalve voor Gelderland en Limburg. Voor de eerste provincie geeft de staat naar den ouderdom en den burgerlijken staat 535 mannen, 512 ongehuwde, 19 gehuwde en 4 weduwenaars, 28 vrouwen, 5 ongehuwde, 22 gehuwde en 1 weduwe, minder. Dit verschil spruit hieruit voort dat men destijds eenen ouderdomstaat heeft laten drukken, waarop de militairen met hunne gezinnen en de gevangenen in de gemeenten Tiel en Zutphen niet waren opgenomen.

Voor Limburg was enkel een staat naar den ouderdom met onderscheiding van het geslacht opgemaakt, waardoor de algemeene ouderdomstaat van het Rijk zich tot de onderscheiding naar de beide geslachten moest bepalen. Het opmaken van eenen nieuwen ouderdomstaat voor Limburg, met onderscheiding van den burgerlijken staat voor elk geslacht, heeft verscheiden fouten in de vroegere bewerking doen ontdekken. De militaire bezetting te Maastricht, behalve vrouwen en kinderen uit 3959 man bestaande, was genomen als ongehuwd, hoewel zich hieronder 173 gehuwden en 8 weduwenaars bevonden. Men verkrijgt hierdoor (zie bladz. 74 der staten van de bevolking der steden en gemeenten in het Koninkrijk der Nederlanden, op 1 Januarij 1840, 's Gravenhage 1841) voor de mannelijke bevolking van Maastricht, naar den burgerlijken staat ingedeeld, 9881 ongehuwden, 3275 gehuwden en 401 weduwenaars en voor het totaal der toenmalige steden 17553 ongehuwden, 6710 gehuwden en 893 weduwenaars. De mannelijke bevolking van Nieuwenhagen, arrondissement Maastricht, wordt op diezelfde bladzijde met 9 verhoogd, 567 in plaats van 558, of voor de gehuwde mannen 169 in plaats van 160. Het getal gehuwde mannen van het arrondissement (bladz. 76) wordt hierdoor 11886 in plaats van 11877 en de geheele mannelijke bevolking 38212 in plaats van 38203. Voor de gemeente Horn, arrondissement Roermond, moeten de cijfers voor de ongehuwde en gehuwde mannen verplaatst worden; die gemeente telde namelijk 244 ongehuwde mannen in plaats van 127, en 127 gehuwde mannen in plaats van 244. De bevolking van Nederweert was 100 zielen, 53 mannen en 47 vrouwen te laag opgegeven, ook was de indeeling naar den burgerlijken staat geheel onjuist; men telde namelijk in die gemeente 2111 mannen, waarvan 1372 ongehuwd, 623 gehuwd en 116 weduwenaars, 2119 vrouwen, waaronder 1337 ongehuwden, 623 gehuwden en 159 weduwen. Voor het arrondissement Roermond wordt hierdoor het cijfer der mannelijke bevolking 36315, waaronder 23794 ongehuwden, 11056 gehuwden en 1465 weduwenaars, dat der vrouwelijke 36228, waarvan 22546 ongehuwd, 11036 gehuwd en 2646 weduwen. Na deze verbeteringen verkrijgt men voor de geheele bevolking van Limburg de volgende cijfers:

MANNELIJK GESLACHT.				VROUWELIJK GESLACHT.			
Ongehuwden.	Gehuwden.	Weduwenaars.	TOTAAL.	Ongehuwden.	Gehuwden.	Weduwen.	TOTAAL.
65900	29652	4131	99683	60082	29558	7505	97145

Ten einde de bestaande leemten te herstellen laten wij thans volgen, naar de toenmalige administrative indeeling in twee arrondissementen en naar de onderscheiding in steden en gemeenten ten platten lande, eene opgave van het getal huizen en huisgezinnen en van de bevolking naar het geslacht, den burgerlijken staat en de kerkgenootschappen ingedeeld, voor elke gemeente van Limburg op 1 Januarij 1830. Voorts de staten naar den ouderdom, het geslacht en den burgerlijken staat van elke provincie en het Rijk op datzelfde tijdstip, diezelfde staten voor Gelderland, Limburg en het Rijk op 1 Januarij 1840, onder verwijzing voor de overige provincien, naar de reeds in 1841 gedrukte opgaven.

BEVOLKING VAN HET AAN NEDERLAND VERBLEVEN GEDEELTE DER PROVINCIE LIMBURG OP 1 JANUARIJ 1830.
